

# Vough & Sons, Inc. brings NY customers to Pa.

Though Vough & Sons, Inc. of Bangor, PA has been an International Harvester dealer since 1955, the business actually got

underway in 1944 when Clark E. Vough began his repair shop in Bangor, working predominantly on International Harvester im-

plements.

By 1964 it was apparent that more room was necessary to accommodate an increase in business, and the firm moved to its present location along Flicksville Road, about three-quarters of a mile outside of town.

Nineteen seventy-four marked the beginning of the second generation of ownership as Clark's sons Edward and Earl took charge

of the business.

With Earl acting as President and Edward managing the shop and secretarial duties, other employees include Bookkeeper, Mary Frances, Parts Manager, Paul Lockard, mechanic, Mark Uhler, truck driver, James Martin, and Earl Lambert in the parts department.

Being located in eastern Pennsylvania, only a short distance

from the Delaware River, Vough & Sons find themselves providing parts and service to many New York customers, as well.

But regardless of which state they're from, February is a big month for Vough customers with the company's Inventory Sale beginning February 1, and running for three weeks, this year featuring reductions on all 3288, 3688, 5088, and 5488 series tractors.

## IH receives new product award

International Harvester was awarded the Illinois Society of Professional Engineers Governor's New Product Award for its 50 Series farm tractors in ceremonies recently conducted by Illinois Governor James R. Thompson.

The society's award was for the design of IH's microprocessor controlled, monitored and safeguarded transmission in the three 50 Series tractors, which range from 135 to 187 PTO horsepower.

IH's award was for the heavy industrial category. Two other Chicago-area firms also were honored by the governor.

American Research and Engineering, Elgin, was awarded for a microminiature switch it developed for electronic devices, and Oak Switch Systems, Crystal Lake, was honored for a high speed data entry keyboard.

IH's 50 Series tractors were introduced in 1981, culminating a seven-year development program in which IH invested more than \$200 million for research and capital improvements. The tractors were designed at the company's Agricultural Equipment Engineering Center in Hindsdale and are built at IH's Farmall plant in Rock Island.

Located near PA's eastern border, Vough & Sons, of Bangor caters to many New York I.H. customers as well.

### Drawbar Time — and Titan Tractors

For thorough reliability in drawbar time put your trust in Titan 10-20. Be sure that your new tractor is thoroughly right for plowing, seed-bed making, harvesting, etc.

Rely on the good material in Titan construction, and in kerosene economy. Be sure of practical details and conveniences — such as Titan wide fenders, comfortable platform and seat, and adjustable drawbar — making for day-after-day satisfaction in the field.

A little later when the belt-power season looms biggest, such essentials as the throttle governor, and the large, wide friction-clutch pulley in Titan 10-20 will demonstrate again the wisdom of your choice.

When you make your power investment, remember the reputation of the International Harvester tractors, and the security in International Service. Early decision and action is necessary!

### Drawbar Time and International® 5088, 5288 and 5488 Tractors

High-torque turbocharged diesel engines plus a highly innovative transmission with 18 uniformly spaced forward speeds usher in a new dawn of performance for greater day after day productivity and reliability. Here are just some of the features that make the 50 Series tractors the industry standard for engineering excellence.

- International turbo diesel engines with 136.1\* 162.6\* and 187.0\* PTO hp
- Exclusive Power Priority hydraulics
- Exclusive Forward Air Flow cooling
- Smooth, easy Synchro-Tri-Six shifting
- 2 wheel drive and all-wheel drive models available

PLUS... A 3-year or 2500-hour extended warranty on the engine and drive train! Stop in soon for details.
