

# Revolution

(Continued from Page 27)

changes in number and size of American farms and their need for equipment of ever-increasing capacity, the Company relocated its production in modern and efficient plants.

In 1952, the Fiber and Twine Division moved its manufacturing operations to a newly built, modern plant in New Orleans, and the old McCormick Twine Mill, in Chicago, was disposed of. The new location made possible important economies in the transportation of raw fiber to the mill and in the distribution of the finished twine.

In 1965 the division introduced a new rotproof, plastic twine pat is lighter and stronger than sisal twine. Although it may not wholly replace sisal twine, it will free the Company from the uncertainties of the world sisal market. Dairy and refrigeration equipment had for many years been an important sector of International Harvester's farm equipment line. In 1907 the Company had introduced a quality line of cream separators, and milking machines in 1929. In 1935 it began the production of farm milk coolers and large wald-in coolers for the preservation of all perishable products of the farm.

## Cooper Hardware

traces roots

back to 1880's

The well-known Cooper's Hardware Store originated in the mid-1880's when two Montour County brothers, John E., and Lloyd Krumm decided to open a hardware store in Turbotville.

Lloyd Krumm remained with the firm only a short time, selling his interest to Elmer B. Derr. The new partnership of Krumm and Derr soon added farm implements to their line.

On April 18, 1910, Krumm and Derr sold their property and stock to S.E. Hartley and Roscoe S. Blaine, who remained in business until 1936 when the business was sold to S. Lee Menges.

In 1941, Menges sold out to Donald C. Cooper who added International Harvester and gave the Main Street, Turbotville, firm the name which has endured for 43 years.

Donald Cooper did much to further the growth of Cooper Hardware, modernizing the original Krumm and Derr building, erecting an addition and adding a large parking lot. In 1973 Cooper incorporated, appointing his son D. Blaine Cooper as manager three years before the elder Cooper's death in 1978.

With Blaine's wife, Diana Y. Cooper, acting as Secretary-Treasurer, other Cooper employees including Vice-President Julia Ann Howell, Shop Foreman Charles Keener, Parts Manager James Delany, and Salesman Fred N. Bower, a veteran I.H. employee with 30 years of service. And Blaine, himself, with 23 years of I.H. experience behind him, is well suited to carry on the Cooper tradition of quality International sales and service.

The 90 horsepower model 3288 30 Series tractor shown above is powered by an IH 358 cubic inch naturally aspirated diesel engine. The 30 Series' easy shifting transmission has 16 forward and 8 reverse speeds operated with right hand controls. Completing the 30 Series line is a 113 horsepower model 3688 tractor, at 112 hp 3488 Hydro, and an 80 hp 3088 model, the four tractors in this series serve the U.S. 80-120 horsepower segment of the tractor market.

THE WORLD'S FIRST REAPER  
Public Test of  
Cyrus Hall McCormick's Invention  
Steeles Tavern, Virginia, July 1831

On a hot July day in 1831, Cyrus Hall McCormick demonstrated the world's first successful reaper. Only the McCormick family, some field hands, and a few neighbors were present for this event. None of those present could possibly have foreseen the changes the reaper would bring. With it, the farmer began his first step toward mechanized agriculture. Several years would pass before McCormick deemed his machine worthy of commercial sale. During that time, the reaper was improved considerably over the 1831 model. It was patented in 1834.

### SPECIAL

### ON NEW IH TRACTORS

- 584
- 684
- 784
- 234 • 244

#### NEW IH PLOWS

- 510 4 btm., 18"
- 725 5 btm., 18"
- 5513 Chisel Plow, 3 Shank, 13 Ft.
- 4500 Vibra Shank, 12 Pt., 5 Ft.

#### NEW IH DISK HARROWS

- Model 350, 11 Ft., 6"
- Model 370, 12 Ft., 8"

#### NEW IH DRILLS

- Model 5100, 16x7 Plain
- Model 5100, 16x7 Combination
- Model 5100, 18x7 Plain
- Model 5100, 18x7 Combination

#### NEW IH PLANTERS IN STOCK

**SPECIAL**  
120 Forage Box w/Int.  
Running Gear

#### USED EQUIPMENT

- (1) IH Model 1150 Grinder Mixer (Very Good)
- (1) NH Model 354 Grinder Mixer (Excellent)
