

YESTERDAY AND TODAY

Still #1 in Tillage Equipment

A great job of plowing starts with a great plow

If you really take pride in plowing, stop into our dealership and see the full line of innovative plows from White Farm Equipment Company.

Strength for better plowing. Every White Farm moldboard plow starts with an extra-big box-beam main frame for more working weight and toughness. In fact, every component is designed with an extra measure of toughness.

A tradition of quality. Every plow bottom we build is polished by hand to insure faster scouring in the field. Every style is designed to work well in a variety of soil conditions. Our 125 year history of building plows demands this kind of care.

Choose from 10 models. There's a White Farm moldboard plow for you, whether pull-type, mounted, semi-mounted or flex-back. Ten models in all. From one bottom to twelve. So come on in and see our full line. You'll be glad you did.

Every White Farm Equipment Company moldboard plow features our famous box-beam construction for strength and rigidity.

Let us show you the difference in disks.

There's a big difference in disks. And if you've never taken the time to really study what makes one disk more productive than the next, drop into our dealership and let us point out a few facts using models from White Farm Equipment Company.

More weight means better disking. Not a revolutionary thought, but there are ways to spot built-in working weight without putting the implement on a scale. One example is massive box beams of high carbon steel used in all of our disks. More steel means more than durability and rigidity. It adds weight to keep disks in the ground.

Models for every need. Whatever type of disk you need, we've got a model for you. From our massive 281 Offset to the 270 series flex-wing tandem, to the 250 series semi-flexible frame, to the 264 rigid disk. Each offers specific features and attachments to make tillage easier and faster.

Come in and let us show you the difference in disks. And the difference in White Farm Equipment.

Nobody builds a more accurate planter than the Seed Boss®

And we can show you — on a Seed Boss planter in stock — exactly why we'll match our White Farm planter against any other brand. In conventional, minimum-till or no-till.

More accurate planting depth and seed spacing can mean better stands and yields. Come in and see how little it takes to own what a lot of farmers believe is the most accurate corn and soybean planter sold today: the Seed Boss.
