FICKES SILOS...

Dependable-Reliable

Systems That Assure Continuous Service Day After Day

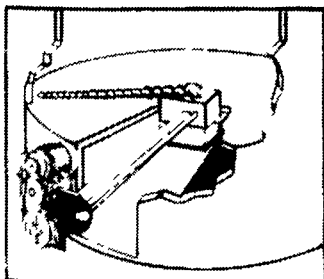

IT ALL COMES DOWN TO THE BOTTOM

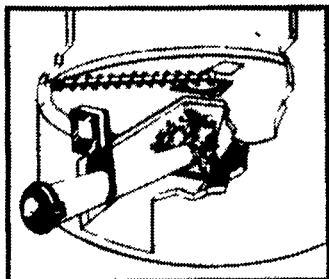

The unloader is the hardest working part of any storage system. It's at the bottom of efficient, trouble-free feeding. Laidig, the name that has become synonymous with top quality, bottom unloaders, offers two heavy-duty unloaders, both noted for their exceptional dependability.

The Laidig 43 series features a "full-time" POW-R-SWEEP auger that forces its way into the mass, and undercuts it every time you feed. Tapered fighting moves grain rapidly to the unit's center. Here, it drops into the hopper and is carried smoothly by the exit auger outside, to waiting animals.

The Laidig 98 series features a ring drive sweep arm that powers its way through hard-packed silage, driven from a track attached to the base of the structure. With power applied at the outer end of the arm, there's less stress on the unloader. Auger knives loosen material from the impacted mass, and tapered fighting moves silage to the center of the unit where it drops into the hopper.

FICKES LAIDIG 43 SERIES
The Laidig 43 series for high-moisture grain, can handle any crop you can grow and store. Shelled corn, ground ear corn, milo, barley.

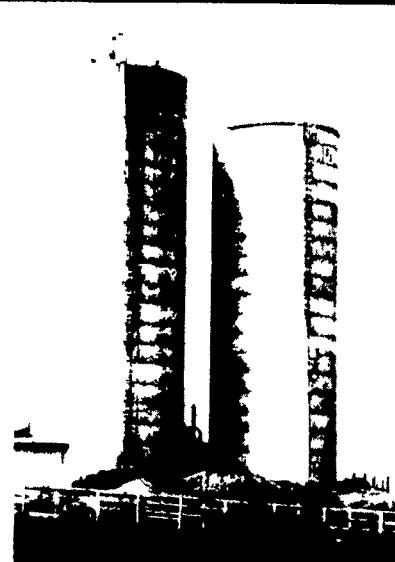

FICKES LAIDIG 98 SERIES
The Laidig 98 bottom unloader can handle whole corn silage, haylage, alfalfa mixed crops, shelled corn, ground ear corn, ground grains.
