

# ANNOUNCING A BETTER WAY TO CLEAN YOUR SOIL

# VAPAM<sup>®</sup> AND SOIL FUMIGANT WATER

Treating your soil with a fumigant helps get your crops off to a better start. But one problem with soil fumigants has been getting even distribution. Until now.

Now, with Vapam soil fumigant and the Hydroflo Cheminjector<sup>®</sup> pump, you can thoroughly fumigate your soil using your irrigation water. That saves you tedious hours of application, and the water does the work of distributing Vapam uniformly through the soil. You get more complete coverage using less fumigant. Without all that extra labor.

So you'll be able to do an even better job of getting potential problems out of the way before

you plant your vegetables. Vapam eliminates verticillium and fusarium wilts and many other soil-borne diseases. And it helps clear the soil of nematodes and many germinating weed seeds. This helps make the job of weed control easier later in the season.

Now you can make better use of your Vapam than ever — at a lower cost than ever. See your Vapam supplier or contact Hydroflo for information on the Cheminjector pump. Follow label directions.
