

JOHN DEERE DISK DRAFT TESTS PROVE

WE DON'T HAVE THE PULL YOU THINK WE DO

The chart below shows the results of disk draft tests John Deere engineers

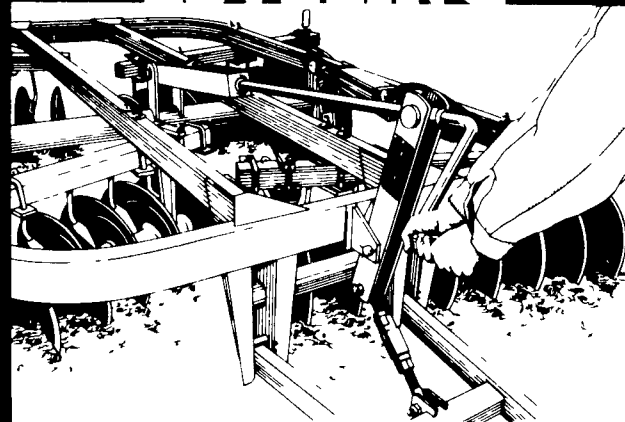

ran in Illinois, Tennessee and Kansas against our major full-line competitor. In the Kansas test we also took on two of the major short-line disks. These tests help dispel the rumor that our disks pull harder. Sophisticated computer equipment accurately measured the results of side-by-side runs. The drawbar pull required by our disk at maximum gang angle was less than, or equal to, that of the competition. At no time did we pull harder. When we went to minimum gang angle (the competition's fixed gang angle couldn't match this ideal adjustment for less-aggressive seed-bed tillage work), we required far less pull. Stop by and let us give you all the details on these draft tests. And we can point out all the features that make John Deere Level-Action disks your best buy.

TODAY'S JOHN DEERE LEVEL-ACTION™ DISKS—1ST IN QUALITY

SIMPLE LEVELING

Level disking is quick and easy . . . turning one crank is all it takes

Leave your wrenches in the tractor: drawn Level-Action™ disks have a simple crank adjustment.

Eliminate a center ridge or valley by rotating this crank. It's the only adjustment needed in most fields.

These disks also put virtually 100 percent of their working weight on the blades, thanks to the Level-Action hitch linkage. See us for details on John Deere disks in widths and weights that match your needs.

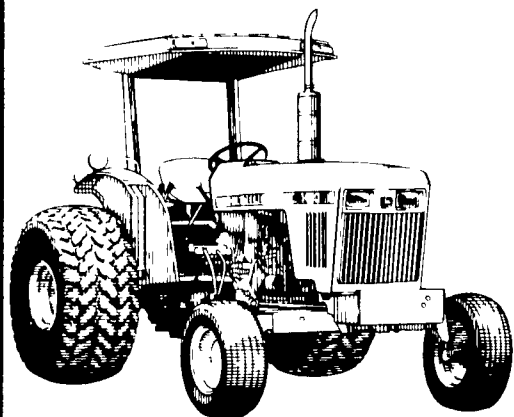

The Long Green Line™

Nothing runs like a Deere™
