SYSTEMS

**New SWISH SATELLITE™ System Waters Chicks & Poults From Day 1**

The biggest problem with founts and other supplementary waterers is manpower — the labor needed to clean and hand-fill them. Also, birds don't always get clean, cool, fresh water — which can cause health problems and poor feed conversion.

But now there's the new Swish SATELLITE system.

It attaches to any Swish floor watering system (and most other brands, too), to give you an automatic system that baby birds take to immediately.

And your birds get fresher, cleaner, cooler water that they love to drink. Which means they'll drink more of it. And that means healthier birds.

The Swish SATELLITE also cuts water waste — which means drier litter, less disease.

The NEW SWISH - total commitment to quality & service
