

Springs Equipment Inc. serves 3 states

Springs Equipment, Inc. of Springs, pa., started as an auto garage but soon converted to an Allis Chalmers farm equipment dealer.

Alton and Ralph Miller founded the business in 1939 under the name Miller Brothers and operated it as an auto garage until 1941, when they converted to farm

equipment and started carrying the Allis Chalmers line.

In 1976 Alton's son, Larry, bought his uncle Ralph's part of the business and in 1980 Larry and his wife, Gerry, bought the rest of the business. Larry Miller has been a full-time employee of the business since 1973 when he started in sales. Today he and his wife operate the business which offers service, parts, lawn and garden equipment and farm equipment.

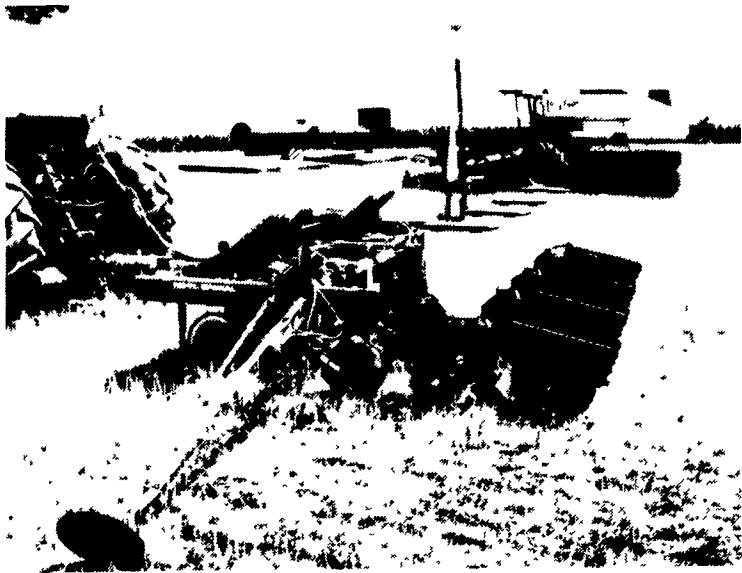

In 1982 Springs Equipment won the Circle of Honor award for parts dollar increase. Larry said that business volume has more than doubled since 1976.

The business serves parts of three counties in Pennsylvania, two counties in Maryland and three counties in West Virginia.

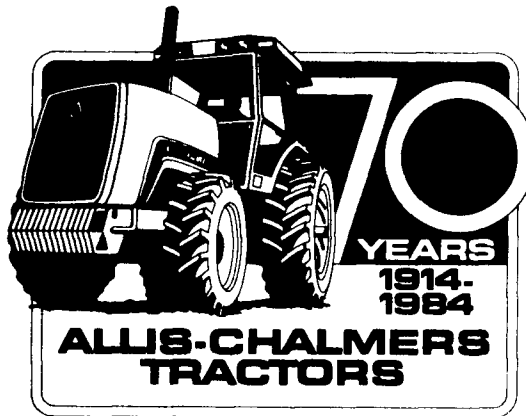

Some of Springs Equipment's key employees are: Menno Yoder, service manager; Randy Glofelty, parts manager; and Martha Miller, office manager.

Starting as Miller Brothers auto garage, Springs Equipment, Inc. soon became an Allis Chalmers dealer and has been serving farmers with their equipment for 43 years.

The Model 333 "No-Til" Special planter from Allis-Chalmers Corporation is designed for conservation tillage applications and features a bolted frame which allows it to flex over rough ground. In addition, the planter's fluted coulters are mounted to one of three tool bars approximately, 12 inches from the planter unit. This close mounting allows units to follow the coulters in hillside planting. Mounting the coulters to the planter frame, instead of the unit, reduces bouncing and assures coulters penetration. The Model 333 "No-Til" Special can be equipped with either air or plate planters and, as an option, a horizontal auger fill system can be added for filling granular fertilizer hoppers from the ground.
