## Pick the weeds in your corn you'd like to get rid of...

 morningglory	 cocklebur	 sunflower
 smartweed	 pigweed	 velvetleaf

## Then pick Banvel® herbicide... the Big Plus...to do the job.

**Pre-emergence:** Banvel tank-mixed with "Lasso" to get broadleaf weeds along with grasses ready and waiting when later weeds germinate

**Early layby** (in corn up to five inches high) use Banvel at a one pint rate. Stop weeds before they've had a chance to develop. This Banvel overlay controls cocklebur, sunflower, annual morningglory, other troublemakers

**Post-emergence** (corn up to 36 inches) Banvel herbicide controls the real problems—like smartweed, velvetleaf, bindweed, and seedling Canada thistle

Before buying a less adaptable herbicide that may be short on performance, check out the Big Plus of Banvel from Velsicol
