

Braund runs for Penn State Alumni Council

FAYETTEVILLE, N.Y. — Darwin G. Braund, a 1956 graduate of Penn State's College of Agriculture, has been nominated for the Penn State Alumni Council.

Braund, the director of Dairy and Livestock Research and Development with Agway Inc, Syracuse, N.Y., graduated from Penn State with a bachelor's degree in dairy science. He obtained his master's degree from the University of Wisconsin in 1961 and his Ph.D. from Michigan State University in 1968.

While at Penn State, Braund was president of Delta Theta Sigma fraternity and was a member of Alpha Zeta fraternity. He served as manager of the Dairy Exposition and was editor of the "Ag Hill Breeze." He was a member of

Darwin G. Braund

the dairy judging team, Coaly Society, the Ag Student Council and was a Sears and Roebuck Scholarship recipient.

Among his alumni activities are life membership in the Penn State Alumni Association, the Dairymen's Club and the College of Agriculture Alumni Society (CAAS). He is a member of the Penn State Club of Syracuse, N.Y. and Penn State Partners. Braund served six years on the CAAS board of directors, four years on the Ag Arena Campaign Committee and has been chairperson for CAAS Self-Study Committee and the Ag Arena Parents Campaign.

In 1983, Braund received both the Distinguished Alumnus Award presented by the Department of

Dairy and Animal Sciences and the Philip Mitchell Alumni Service Award.

Braund believes that alumni have the opportunity to be positive change-makers in Penn State's changing atmosphere. "We must effectively utilize alumni, friends, administrative and faculty talents to multiply the University's quality

and reputation," he said.

With a broad background in service to Penn State, Braund says that one's debt to the University is never paid. "I would welcome the opportunity to continue my payment as a member of the Alumni Council," he said.

Elections for the Alumni Council will be held later this month.

Narvon mine walk planned

NARVON — In honor of the National Day of Action declared by Lois Gibbs and the Citizens' Clearinghouse for Hazardous Waste, the Red Rose Alliance will hold a walk-a-thon on Sunday, May 6 at 1 p.m. Departure will be from

Rea & Derrick's parking lot in New Holland; destination is the Narvon Mine. A picnic will be held following the walk.

To obtain pledges, call (717) 354-7527.

WESTFALIA HIGH TECH DAIRYING®

CODATRON

Individualized computer feeding system

To be successful in dairying today, you know how important it is to be in complete control of your feeding program and to have all the information possible on each and every cow. That's why Westfalia has developed the Codatron Individualized computer feeding system.

With Codatron, milk production and profits can be maximized while minimizing health problems, thanks to an early warning system. And unlike many other units, Codatron is an expandable system that won't become obsolete.

The feeding system is quality built and basically foolproof and automatic. You'll have dairy reports of herd conditions and performance. Ration adjustments can be made quickly and easily. You'll be alerted to problem cows fast.

The Codatron is available in two basic models. The F 26 with feeding capabilities to 999 cows, up to 26 feeders, double ration capability with daily consumption reports. The Model L offers feeding plus breeding management capabilities.

And that's not all. Westfalia's Codatron is designed for expansion into parlor data milk functions and home computer interfacing. Watch for new breakthroughs to be introduced soon!

Contact your Westfalia Sales Center today. Find out why Westfalia is truly the leader in high tech dairy equipment. For the name and location of your nearest Sales Center, call or write

BACKFLUSH SYSTEMS

The entire Westfalia Backflush Sanitation System operates from a single supply line. It is easily installed, simple to operate and quick to maintain.

The Automatic Sanitizing Aid For Better Herd Health

- Safe • Reliable
- Fully Automatic

Mastitis is often the most costly disease in any dairy operation. But thanks to Westfalia's System, the costly contamination of a milking cluster is virtually eliminated.
