

## Rapp selected for international exchange

Donna Rapp, 25, of Ferndale, Bucks County, has been selected as an International 4-H Youth Exchange Representative to Switzerland. Miss Rapp will depart June 10 for six months in Switzerland, where she will experience cross-cultural opportunities while

living with host families. The IFYE program is conducted by the National 4-H Council in support of the 4-H program of the Penn State Cooperative Extension Service. Locally, the Bucks County Cooperative Extension Service and the Bucks County IFYE Com-

mittee handle the program. The program emphasis is agriculture, and participants have the opportunity to live and work on farms. Representatives share the culture, customs, and information on economics, government, and history of the United States in a

one-on-one relationship with their host families. While in Switzerland, Miss Rapp will be able to compare farm management practices, and new methods and techniques of agriculture. Miss Rapp was selected as representative because of her involvement in the 4-H program. She was a member of the Unami 4-H Club for 9 years, serving as secretary and president. Currently Miss Rapp is completing her master's degree in

biology from Shippensburg University, where she is a member of the Biology club and Outing clubs. Her academic goal is to become a veterinarian, and she hopes to compare veterinary practices in the United States and Switzerland. Miss Rapp will be available for speaking engagements to share Switzerland's agriculture, family life, and cultural experiences after she returns to the United States in December 1984.

## BETTER BALES, FASTER. NO MATTER WHAT YOU BALE.

The toughest hay Tangled stover Slippery straw Balage Gehl balers bale them all with ease. Our new 1460 and 1860 balers feature the exclusive Super-Start™ bale starting system which really pulls in the crop fast. This starting system allows faster ground speed and handles big windrows with ease and low horsepower requirements. Any crop can be rolled into long-lasting bales of just the right density when you've got Gehl's Total Density Control (TDC)\* working for you.

The secret to Gehl's new balers is the wide opening of the Power Feed Throat (a) and the bottom ribbed steel rollers (b) that start bales fast and take your heaviest windrows. Result: fast positive starts all of the time.

TDC forms bales with the highest density possible. Or you can vary the density, depending on crop and moisture conditions. To finish off your bale quickly our new Auto-Electric Wrap (optional) ensures a tight twine wrap automatically. Gehl rolls more good ideas into one baler than anyone. Make us prove it with a demonstration. Gehl Company West Bend WI 53095
