

EXCLUSIVE CUTTERHEADS

When it comes to forage harvesters, nobody beats John Deere's drum

In every John Deere pull-type and self-propelled forage harvester you'll find the latest in forage harvester technology; the segmented-knife Dura-Drum™ cutterhead.

Since our cutterhead is an enclosed drum, you won't have to worry about material getting inside and sapping horsepower. The segmented knives are easier to replace and adjust than full-width knives, too.

So when it comes to cutterheads, the competition and their full-width knives just can't beat John Deere's Dura-Drum. Come by the store and let us show you a John Deere forage harvester soon.

Easy to hook up

John Deere's pitmanless 350 Mower offers unique fourth-point linkage

The 350's unique fourth-point linkage and double framing provide faster, higher cutterbar lift.

Reliable for years

John Deere's 660 Rake offers long, dependable work life

You'll get years of dependable service with the 660 Rake. Five bars of rubber-ball flex teeth are standard.

SQUARER BALES

John Deere's baler line builds squarer, stackable bales

To build solid, square-cornered bales consistently, you need consistent control of the hay. And John Deere's 327, 337 and 347 Balers give that control from the moment hay touches the pickup.

A wide pickup with extra teeth lets these balers take in all the hay in today's wider windrows. There's even a compressor to keep the hay under control.

A floating tapered auger and adjustable feeder forks take over to keep material flowing evenly. The gear-driven knotter puts the finishing touch on these solid, stackable bales from John Deere.

The Long Green Line™

Nothing runs like a Deere™

Now every riding mower,
lawn tractor and
lawn and garden tractor
John Deere makes can be
equipped to manicure
your lawn
as you mow.

Nothing Runs Like a Deere®

Time was if you wanted a John Deere that could mow and collect clippings simultaneously, you had to stick with a riding mower or an 8- to 16-hp lawn tractor. But now you can buy even our most powerful lawn and garden tractor and not have to worry about the rake work. Because John Deere offers collection systems to fit 200, 300 and 400 Series tractors. For 200 Series there's a 6½-bushel twin-hammer rear bagger. For 316, 318, 420 and 430 Tractors there's the Tilt Dump and the Hydraulic Dump. Both have 13-bushel hopper and 5-speed PTO-driven fan. The Hydraulic Dump has a 5½-ft. lift height for easy dumping into a truck or wagon. See us soon for a demonstration.
