

Anthracnose and early blight. Bravo[®] 500 beats them both.

The fact of the matter is, when it comes to controlling early blight, no other fungicide on the market can match Bravo 500 fungicide for effectiveness.

And you get that same kind of first-rate performance against anthracnose too.

Which makes Bravo 500 the one fungicide you can count on to beat your two toughest diseases.

In fact, Bravo 500 consistently provides unsurpassed protection against 9 major tomato diseases.

What's more, you can apply Bravo right up to harvest no matter whether your crop is mechanically harvested or handpicked.

So this season, make it Bravo 500. It's all the fungicide you'll need to beat your two toughest tomato diseases. And the best part is you'll have healthier vines, a healthier crop and a bigger top quality yield to show for it.

Bravo 500 from SDS Biotech. Because you give it all you've got.

Always follow label directions carefully when using agricultural chemicals.
