

Just Arrived... TRUCKLOAD SALE ON LOADERS. Will Fit All Model Case Tractors And Other Brands.

Great loaders for great loader tractors.

Prices You Can Afford

The 56L Quick-Tech loader (below right) for Case 1194, 1294 and 1394 tractors is easy to put on and take off. Smooth handling. It's available with many practical attachments to make it excellent for dairy/beef operations.

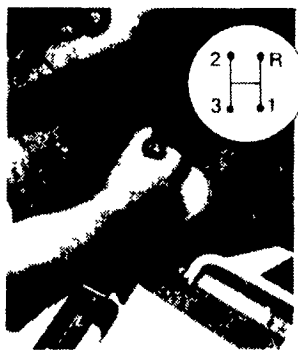

Both hand and foot throttles are standard. Foot throttle for headland travel and loader work. The hand throttle for day long field operations.

74L Quick-Tech loader (below left) will speed you through feeding and cleaning chores. Quick and easy to put on or take off. Big capacity. Fits Case 1494 and 1594 General purpose tractors including models with mechanical front drive and the model 1394 with MFD. A variety of attachments match the 74L to field and barnyard material handling.

Differential lock (standard) lets you direct power equally to both wheels when one wheel starts to slip to keep moving through slippery or difficult conditions.

Tractor features like low effort steering, grille top front lights, standard differential lock, hand and foot throttles, 12 speed power shift or 12 speed synchromesh transmission make the new Case General Purpose models ideal for dairy and beef operations or for general loader use. Add optional MFD (Mechanical Front Wheel Drive) with front wheel limited slip differential and differential lock on rear wheels and you're close to the ultimate in loader units.

Case 12-speed synchromesh transmission is standard on 1194, 1294, 1394, 1494 and 1594 tractors. You can shift on-the-go in 2nd and 3rd gears in each range. First and reverse in straight line are especially handy for loader work. Case 12-speed power shift available on 1394, 1494 and 1594 models (optional).

MODELS IN STOCK: 56L, 74L and 90

NEW CASE UNILOADER

SPECIAL SALE

HAND CONTROL LEVERS

Come & See The All New McCURDY ROLLING HARROW

Dual acting tandem rollers provide superior secondary preparation of seedbeds

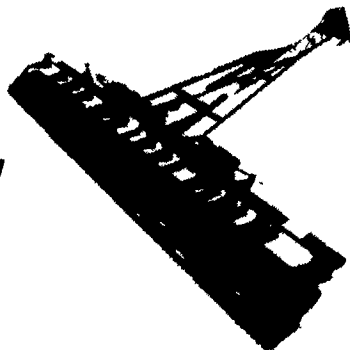

The Clod Buster

ROLLING HARROW

Leading roller of Rolling Harrow has pitched blades for aggressive action on the soil. Angle of blade promotes penetration of large clumps and vigorous crumbling of earth. Trailing roller is passive with perpendicular blades to condition the soil.

The Rolling Harrow is an excellent tool for incorporation and secondary preparation of a smooth seedbed. Tandem rollers of scalloped spiral blades mulch, agitate and mix the earth leaving finer soil at seedbed level and coarser soil and clods on top.

The base unit is 13 foot wide. Hydraulically operated folding wings from 2 to 6 may be attached for a maximum width of 25.

Adjustable tongue permits use of the Rolling Harrow by itself or in combination with other types of tillage tools such as discs, 5 tines and other field cultivators. Hydraulic lines couple to tractor hydraulic lever on the all controlled from the tractor.

The effectiveness of this Rolling Harrow is due to the unique dual action design. Blades on the lead roller are pitched at an angle allowing the bar to penetrate the soil easier. This makes the forward roller aggressive cutting through and breaking up larger clods. The second roller has bars perpendicular to the center shaft making it a passive roller to condition the soil. Together the two rollers deliver the right combination of action for a firm seed bed.

Onboard wings fold flat on top of the center base for transport. Two sets of dual wheels on the center base provide wide wheel base for smooth trailing.
