

Post hole digger reported

AC reports tire study

MILWAUKEE, Wis. — Harnessing your tractor's horsepower with front-wheel-drive and radial tires is the subject of a handy new 12-page booklet, "Make Your Tractor More Productive," published recently by Allis-Chalmers.

In tests conducted by Allis-Chalmers in cooperation with Armstrong Rubber Company using 170-PTO-hp 8070 tractors, the agricultural radial tires demonstrated better traction, more horsepower converted to working horsepower, improved flotation, less soil compaction and greater operator comfort.

In unplowed soil, front-wheel-drive tractors with radial tires covered 5.2 percent more ground than those with bias ply tires. In

disked soil, the difference was 5.9 percent.

The tests demonstrated that tractors with radial tires can cover more ground than those with bias ply tires. There were other benefits, too. The 15 percent greater tread depth on the radials plus new rubber compounds can result in reduced weelskip and up to 30 percent more tread life.

In addition, recent tests at North Dakota State University show that agricultural radials improve tractor fuel economy by a margin of some 4 cents per acre.

For more details on these tests, write for a copy of "Make Your Tractor More Productive," P.O. Box 512, Dept. HD, Allis-Chalmers Corporation, Milwaukee, Wisconsin 53201-0512.

BOWLING GREEN, Oh. — Green Manufacturing, Inc., manufacturer of PTO driven post hole diggers, introduces the Greenline EM-5000 digger to its family of shorline agri-implements. The Greenline EM-5000 will fit any tractor with category I or II 3-point hitch and is designed for farm use.

The Greenline EM-5000 features a Comer gear box, constructed of precision ground heat treated, forged steel alloy gears and tapered roller bearings for trouble free service. A shielded Bondioli & Pavesi PTO provides the heavy duty link between gearbox and tractor. The shielded PTO features automotive type u-joint and a quick disconnect. The boom and u-frame are constructed of 2-7/8" diameter heavy-wall pipe. Auger sizes are available in 6", 9", & 12" diameter, featuring replaceable cutting heads.

the Greenline EM-5000 or other Greenline implements, write Greg Loy, Agricultural Sales Engineer,

Green Manufacturing, Inc., P.O. Box 408, Bowling Green, Ohio 43402.

Greenline EM-5000 post hole digger will fit any tractor with Category I or II 3-point hitch.

Top ag leaders named

PARK RIDGE, Ill. — For the fourth year in a row American Farm Bureau president Robert B. Delano has been named the most influential non-government farm leader in the annual survey "Who Runs America" conducted by the national news magazine U.S. News and World Report.

The survey solicits top national opinion-makers to rank leadership in a dozen major fields on the basis of national influence. U.S. Secretary of Agriculture John R. Block and Delano topped the

overall list which combines both government and private industry leaders. Robert Hanson, board chairman of Deere & Company, and Deputy Secretary of Agriculture Richard Lyng were also named.

Delano, a grain farmer from Warsaw, Virginia is a former president of the Virginia Farm Bureau, and is serving his third term as president of the 3.2 million member-family American Farm Bureau Federation.

Green Manufacturing manufacturers a complete line of PTO-driven post hole diggers, hydraulic post hole diggers, agri-hydraulic cylinders, 3-point scraper blades, transporters and forklifts. For more information on

"Twist-Lock" cups: newest innovation from the new leader

...another reason SWISH saves you more labor, more birds, and more money

The newest twist in cage watering makes cup cleaning and maintenance a real snap - it's SWISH's Twist-Lock cups for cage layers and brood-grow watering systems

Saves labor. No more contortions with hand tools inside a cage - one simple twist of the wrist unlocks and removes the unitized cup and valve. It's that easy to maintain when necessary. But with SWISH it's hardly ever necessary. That's because our cup is self-cleaning. Our patented valve keeps the cup clean by flushing any feed particles out so birds can consume them with the water.

Installation is a snap too with SWISH's new cups - they simply snap into the desired location and the hose attaches to the water line outlet. These are some

of the ways SWISH's new cup saves you labor - easy installation, low maintenance and labor savings between flocks because our cup constantly cleans itself.

Helps save more birds. Because our cup is self-cleaning, algae and bacteria growth is not a problem as with cups that don't flush out feed particles. Clean cups mean less chance of disease and less mortality. And our big cup means good access to water for a good level of bird health.

SWISH saves you money. That's the bottom line with a system that cuts labor and keeps birds alive and productive.

Get all the facts about our new cup and other SWISH innovations. See your SWISH distributor or contact us.

PATENTED VALVE IS KEY TO OUR PERFORMANCE

Orifice (A) to ces water out; deflector (B) tip (C); d.verts. 1 down to suspend feed (D).
