SQUARER BALES

John Deere's baler line builds squarer, stackable bales

To build solid square cornered bales consistently you need consistent control of the hay. And John Deere's 327, 337 and 347 Balers give that control from the moment hay touches the pickup.

A wide pickup with extra teeth lets these balers take in all the hay in today's wider wind rows. There's even a compressor to keep the hay under control.

A floating tapered auger and adjustable feeder forks take over to keep material flowing evenly. The gear-driven knottor puts the finishing touch on these solid stackable bales from John Deere.
