

NOTICE...SPECIAL SALE ON A NEW GEHL MODEL 2160 HAYBINE, 9'3" CUTTING WIDTH

WITH SPECIAL FEATURES

Also A 7 Ft. Machine Coming In

Full header flotation
The cutting and conditioning mechanisms float independently of the main frame for better cutting control over uneven terrain. In addition, the adjustable guard angle allows you to adapt your cutting header for difficult crops and field conditions and better hillside cutting.

Slip clutch protection
The entire machine is protected by slip clutches, both on the main drive and on the reel as well.

Stub guards - For heavy, tangled crops

COMPLETE WITH HYDRAULICS FOR ONLY \$8,243

No payments or interest until Dec. 1, 1984 With Your Trade-In

NOTICE: Additional Cash Discounts Available If You Stop By & Make Your Deal Now!

HOW TO GET MORE CAPACITY FOR YOUR MONEY.

If you're looking for a high capacity forage harvester to fit a 60-150 hp tractor look at Gehl's economical 750. You'll find the 750 is in a capacity class of its own.

The first capacity secret we'll reveal is our special blower design. The cutterhead is actually set into the blower compartment.

There are no cross augers. No dead spots. Just high speed forage movement from windrow to wagon.

But that's just the start of the Gehl non-stop forage flow story.

Keep a keen edge
Since sharper knives also contribute to increased output, we offer an easy

Exclusive optional 30 gallon water injector system reduces haylage gumming and cuts power consumption up to 37%.

quick sharpening system. Gehl's patented in-head hydraulic knife sharpener puts a factory true bevel on knives. The knife sharpener is optional on the 750 standard on other units. And our single station cutterbar adjustment is the simplest you'll find anywhere.

You wind up fine tuning your cutting system fast — right in the field. And you cut your fuel bill even more. So make sure you get your money's worth in a forage harvester. Check out the cost efficient Gehl line — the economical 750, the high capacity 1000 or the giant 1250.

With Capacity Secrets You'll Like

capacity secrets

You won't find a higher capacity pull type forage harvester than Gehl's 1250. The secret is in its material flow system. Giant sized compression rollers feed crop into the 25 1/2" wide cylinder. With the patented spinner delivery system, the material keeps right on moving into the 41 1/2" blower, and into your trailing box.

The jetaway spinner delivery system is exclusive to Gehl's 1000 and 1250 forage

harvesters. It actually gives material a running start into the blower, hurling it in at nearly 40 mph — no cross augers to plug

built to take it!

Gehl cylinders are built to take the load you put into them. The cylinder on the 1250 is a full 25 1/2" wide with nine knives, all tungsten-carbide faced for longer life and a high quality cut. With short bevel knives you get less chipping and longer edge life, easier sharpening, and the 17 1/2° angle reduces vibration.

Uses As Low As 90 HP Up To 250 HP (This Unit Coming In... Available)
