

Keister's

(Continued from Page A32)

He was particularly proud of the success of the "Pennsylvania Milk Punch" which was introduced by the Snyder County Holstein Association. "Dairy products are perhaps in the most trouble right now," Walt noted, "yet even those people who said they don't like milk really enjoyed the punch." He also cited the success of the "Bunny Burgers" — most people said that they tasted much like chicken. But even that did not slow down the sell-out of 1,100 barbecued chicken halves.

Walt did take a few minutes out from a busy day to entertain one young visitor. She was Mary Ellen Keister his 94-year-old mother who was making her first visit to the event his year. After a brief tour and a cool drink she pronounced the third annual Pennsylvania Agricultural Promotion a success. A moment later, Sam the bear cub went sauntering by and the septuagenarian Daddario brothers were "pickin' and grinnin'" their way through the crowd.

The barley controlled chaos made for a great day of fun for everyone with plenty to do, plenty to eat and plenty of folks to enjoy it with. Don't miss next year's extravaganza.

"Pennsylvania Milk Punch" made for some good refreshment on a very hot day. Here Jarrell Mort, Klingers-town, the SUN Area Dairy Princess, pours a refreshing cup full for a scorched visitor.

This is Lynn Sterner of Denver. We think he was with the Uncle Don's Potato Chip Company.

Two of the lightweights in the horse pulling contest pose with Tom Pasmore of R1 Mahaffee before the competitions began. Doc and Dan finished out of the money Tuesday.

Low Cost Computerized Feed-Mill With 99.9% Accuracy

Sudenga ELECTRO MILL

COMPUTA - BATCH

THE TOTALLY AUTOMATED BATCHING SYSTEM THAT WILL SAVE YOU TIME AND MONEY!

The Computa-Batch is an on-farm feed processing system that will automatically select, weigh, grind, and mix up to 12 ingredients with 99.9% accuracy. Based on tests in actual feeding situations, the Computa-Batch will save 15 to 50% in costs over a PTO mixer/grinder or buying finished feed. Ask for a **FREE COST COMPARISON ANALYSIS** to see how much your actual savings would be.

The horizontal mixer continuously produces any number of 1/2 ton batches. The mill is available in hammer or roller styles. The "user friendly" computer stores up to 60 formulas and offers complete record keeping.
