HOW TO MAKE THE SYSTEM WORK FOR YOU.

You don't even have to write your Congressman. Just get the Vicon Haying System is all.

Because with this trio—A Vicon KM mower/conditioner, one of our heavy-duty hay rakes or tedders, and a new Vicon square baler—you can make hay faster, better and more economically.

The KM 321, for instance, is the fastest mower/conditioner in the world. It's 30 percent faster than other conventional mower/conditioners. A new drive unit lets you operate non-stop.

Take square corners with no drive line vibration or danger of failure. And even if you've got a heavy, dew-wet crop, the KM 321 won't plug, and won't leave you worrying about leaf loss.

The Vicon line of rakes and tedders are just as efficient in their own right. They're

versatile, ideal for short crops or big balers. Rake, turn, fluff. Quickly and cleanly. In a wide range of widths. With easy tine replacement. And, best of all, Vicon rakes and tedders are gentle on your crop.

Last but not least, you'll find that the Vicon SP square balers give you the convenient range of bale sizes and weights to meet your haying needs. The unique counter-balanced flywheel eliminates drive line vibration. The result is a smooth running baler with less strain on the PTO, tractor and operator. The Vicon SP is

also available with hydraulic bale thrower. For more information on the Vicon Hay Systems, or the name of your closest Vicon dealer, just call or write. We think you'll see that when you can't beat the system, there's only one thing left for a grower to do.

Join it.

YOU CAN'T BEAT THE SYSTEM.
