

## Cob Catcher' available for most combines

Cob catcher sieves are available to fit most combines.

PENDER, Neb. — Automatic's Cob Catcher Sieves are available to fit most popular combines according to Ryder Supply.

The Cob Catcher replaces the adjustable chaffer and adjustable sieve in the combine. It allows the cobs to drop through and go into the wagon with the grain. The corn

and cow mixture is then processed through an Automatic Roller Mill directly into bunker, pit or upright silo.

The result is a more nutritional feed and greater yield from available acreage. For another use, cobs can be separated from grain and used in Bio-Mass con-

verter to dry grain. Cob Catcher Sieves are in use throughout the corn belt with good results.

To find out the Cob Catcher adapts to your combine contact the manufacturer, Automatic Equipment Mfg. Co., Department NR, Pender, Nebraska 68047, 402-385-3054, or the distributor, Ryder Supply, Box 219, Chambersburg, Pennsylvania, 17201, 717-263-9111.
