

The skies opened and the

Almost an ag island

Where's that ark?

Beat blight with There's a better in store for you.

The Kissing bridge

Feed by boat

Plus better storage out of your yield.

That's why more and more potato growers rely on a full season schedule of Bravo 500 fungicide.

Nothing equals Bravo 500 when it comes to preventing early and late blight infections that defoliate plants. And Bravo 500 is just as effective against Botrytis vine rot.

It's first-rate control like this, along with proper vine kill, that delivers a better yield at harvest. A healthier crop going into storage.

What's more, Bravo 500 has a built-in spreader/sticker

that insures full and even coverage for maximum disease protection that keeps right on working, even during wet conditions.

And Bravo 500 can be applied by ground, air or through sprinkler irrigation systems.

For unequalled disease control that helps you store a better yield, make it Bravo 500 all season.

Bravo 500 from SDS Biotech. Because you give it all you've got.

Always follow label directions carefully when using agricultural chemicals.
