

Order 4 base milk price \$13.37 for June

ALEXANDRIA, Va. — Middle Atlantic Order Market Administrator Joseph D. Shine today announced a June 1984 base milk price of \$13.37 per hundredweight and an excess milk price of \$11.90. The weighted average June price of \$13.36 was 34 cents below a year earlier.

The butterfat differential for June was 17.3 cents, up from 16.9 cents a year ago. The advertising withholding rate, which is deducted from the base and excess milk price but not the weighted average price, was 10 cents a hundredweight, compared to 14 cents last year.

Shine said that producer receipts totaled 477.3 million pounds during June, a drop of over 31 million pounds or 6.1 percent from June 1983. The average daily delivery per producer decreased 100 pounds or 4.1 percent from last June to 2,311 pounds. The number of producers declined from 7,031 last

June to 6,885 in June 1984. Class I producer milk totaled 221.9 million pounds and accounted for 46.50 percent of total producer milk receipts compared with 44.45 percent a year ago.

During the first 6 months of 1984 total pooled producer milk receipts (3.0 billion pounds) have declined over 130 million pounds or 4.2 percent from the same period in 1983 (with adjustment made for the extra day in 1984). Base milk accounted for 93.07 percent of total producer milk receipts in June compared with 90.61 percent last year. The average butterfat test of producer milk increased from 3.49 percent a year ago to 3.55 this June.

Middle Atlantic Order pool handlers reported Class I in-area milk sales of 188.6 million pounds during June, a decrease of 0.7 percent from a year earlier, after adjustment to eliminate variation due to calendar composition.
