# Our new "300" timber column!

## .6 pound of penta

Morton Buildings' new laminated column is treated to a .6 pound per cubic foot retention of pentachlorophenol preservative. This new treatment meets the federal government specification (USDA Form W 00571J) for the proper treatment of

timber columns buried below ground.

## 100% sapwood penetration

The No. 1 Southern Yellow Pine components of the laminated column are kiln dried before treating to remove much of the water

content, assuring 100% penetration of the sapwood.

To guarantee the new requirements are met, an independent inspection service regularly visits the treatment plants. All lumber not conforming to our specification is rejected or re-treated.

Morton Buildings demonstrates its confidence in these improvements by

now offering a 50-year warranty on the timber column. Our warranty also includes 5 years against paint checking or peeling; 5 years against paint fade and chalk; 5 years against red rust caused by acid rain; 5 years against roof leaks; and 5 years against damage due to snow and wind loads. That's confidence!!
