40 years of proof

Since 1940, Gehl has been building field choppers and forage harvesters with one thought in mind... performance. And, year after year, thousands of satisfied owners prove that we know how to use that specialized experience to build better machines. Today, Gehl concentrates those 40 years of chopping know-how into three fuel-efficient, high-capacity forage harvesters:

Capacity King 1250. The largest capacity pull-type harvester on the market. Gehl's exclusive 24" spinner delivery system keeps forage moving with no cross augers to plug. The giant, 9-knife, 25½" cylinder gives a quality cut. And the new cutterbar adjustment is the easiest anywhere. In-head hydraulic knife sharpener and electric controls are standard too.

New mid-range 1000 gives you the high capacity you'd expect from the big 21" cylinder and fast spinner delivery system. Like the 1250, standard features include the, in-head hydraulic knife sharpener, adjustable

axles, one-way shear bolt protection and attachment down-stop

Fuel saver 750 tackles just about any chopping job. Uses less horsepower per ton chopped than many bigger harvesters. Uses less fuel. The 8-knife cutterhead is set into the blower compartment for smooth, continuous material flow. Add Gehl's patented in-head hydraulic knife sharpener for even more cutting efficiency

Prove to yourself that there's no substitute for Gehl's 40 years of forage harvester experience. See your Gehl dealer soon

Homan gets promotion

UNIVERSITY PARK — W. Wayne Hinich, Associate Director of the Penn State Cooperative Extension Service has announced that Alton E. Homan, Bradford County Agent, has been promoted to the rank of Senior Extension Agent. This is the highest rank a county agent within the Cooperative Extension Service can achieve.

His major responsibility is agronomy education programs in Bradford County. Other responsibilities are in community development, horticulture, farm management, 4-H/youth and forestry.

Homan's agronomy education programs have resulted in increased crop yields. Alfalfa hay yields, for example, have increased to 6½ tons of dry hay equivalent per acre for some cooperators compared to an average production of less than 3 tons per acre.

During the past several years, Homan has had outstanding success in organizing two new agricultural organizations in the county: Bradford-Sullivan Crop Improvement Association and Bradford County Forest Landowners Association. He has demonstrated outstanding leadership ability with these new

Alton E. Homan

groups. He has conducted many meetings with local fire companies on the safe use of wood burning stoves. He has presented many programs to garden clubs, civic groups and other community organizations.

He holds a Bachelor of Science in agriculture from Southwest Texas State University and a Master of Agriculture in Extension Education and agronomy from Penn State.

Two Great Alfalfas

526

Yields, winter-hardiness and Bacterial Wilt tolerance are excellent.

531

High tolerance to anthracnose. Very fast recovery after harvest.

Ask your Pioneer salesman about the alfalfa variety that's right for your farm.
