THE TEXTUREATOR™
Pat. Pending

WHEN YOU WON'T SETTLE FOR LESS THAN THE BEST

Kernels cracked without fines... cobs and husk ground for maximum digestibility. High quality course feed provides increased bulk, allowing animals to eat more ration and better utilize the total digestible nutrients (T.D.N.) of the grains and avoid flash heat. Feeders who change to texturized feeds get better results. Beef cattle have a higher average daily gain. Dairymen report higher grain intake and 1 to 4 point increase in butterfat tests. Texturized ear corn gives you more profit per acre over shelled corn.

The Textureator concept combines 20" underfed Hammer Mill and 13"x30" rolls to process ear corn. The Hammer Mill or Roller Mill can be used individually, thereby giving you a choice of 3 processing options: Roller Mill for small grains and shelled corn, Hammer Mill for pulverizing, and Textureator for coarse ground ear corn — all with one point of entry.
