

How to get 97 cows to produce the milk of 100!*

Simply follow the Purina 2-step Dairy Worming Program.

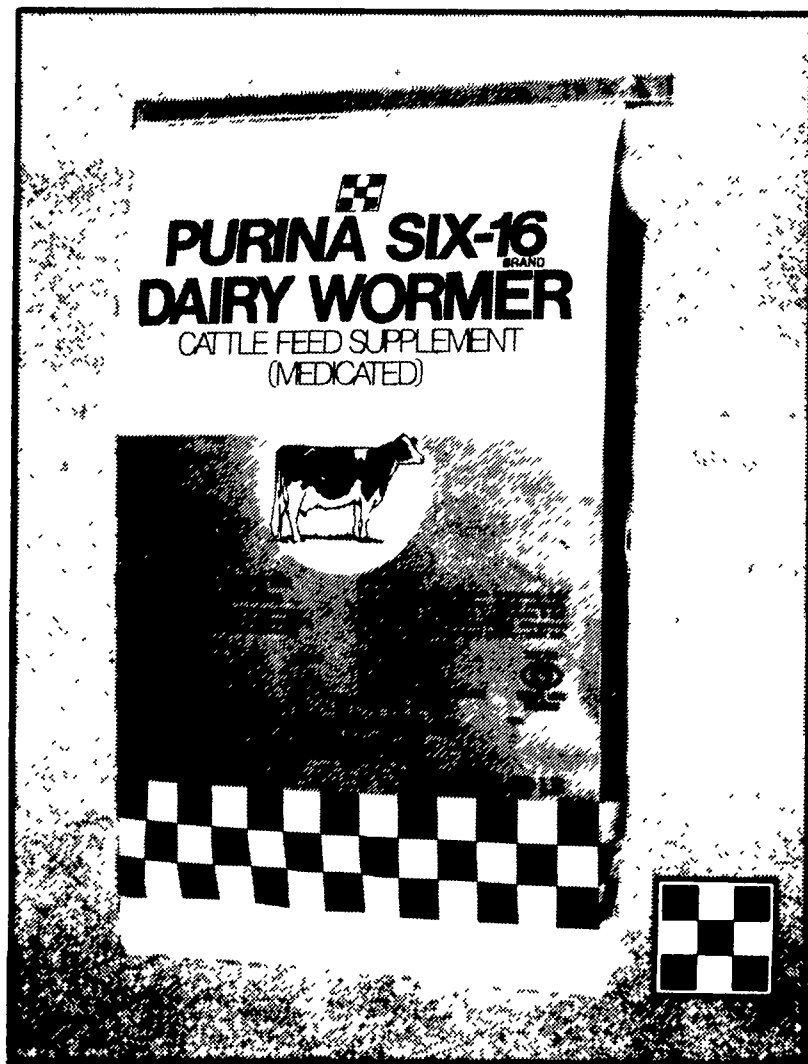

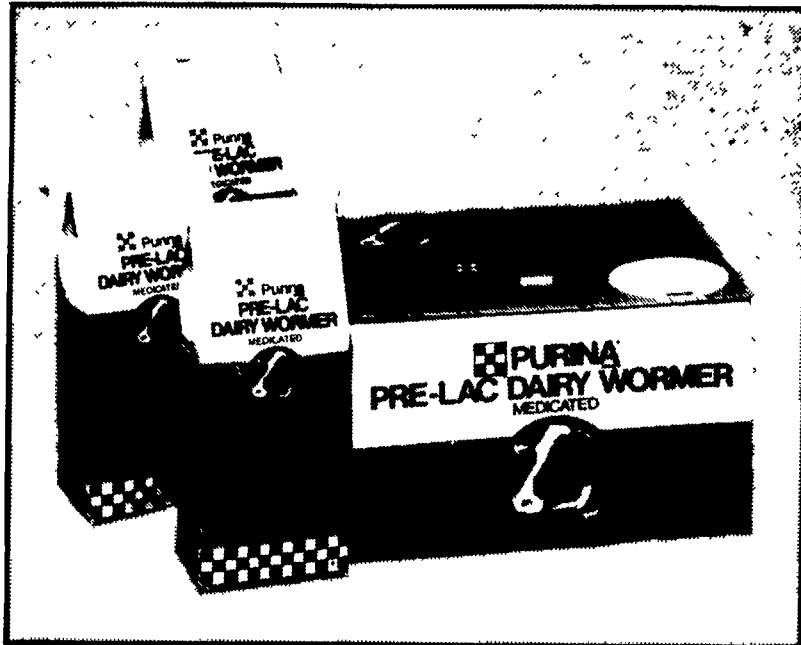

Studies have shown that worming dry cows with Purina® Pre-Lac prior to freshening, and worming lactating cows 60 to 90 days after freshening with Purina Six-16^{BRAND} Dairy Wormer can help your cows produce more milk per head.

It's like having 3 extra cows' production for the cost of worming your cows.

6-16 Wormer is a Cuomophos wormer for lactating cows. Fed for 6 days, a major advantage is the 16% feed carrier. Highly palatable! Plus... The additional nutrients of a feed!

Ask about the Purina 2-Step Dairy Worming Program!
