

## Leigh Ann Kimmel receives dairy award

Leigh Ann Kimmel, R1 Home, a member of the Dayton Dairy Club, was recently recognized as the 1984 Outstanding Dairy Member of Armstrong County. This new 4-H award sponsored by Elderton State Bank recognizes an outstanding dairy member with a monetary award of \$500 to be used toward the purchase of a project animal. Finalists received a \$50 savings bond from Elderton State Bank. From left to right are finalists: Brian Rupp, R2, Dayton, of Dayton Dairy Club; Lara Wilson, R1, Worthington, of Worthington Dairy Club; Bonnie Wilson, R1, Worthington, of Worthington Dairy Club; Monty Miller, representing Elderton State Bank; and Leigh Ann Kimmel, the 1984 Outstanding Dairy Member.

## Solar hot water seminars scheduled

NORRISTOWN - Did you know that in Pennsylvania you can buy a solar hot water system and pay for only one third of the cost?

The Grass Roots Alliance for a Solar Pennsylvania and the Pennsylvania Energy Center, Region I want to help you get into low cost solar hot water. Thanks to the Solar Bank and the Federal tax credits, solar energy is more available than ever. The Solar Bank provides a direct grant to you for 40 percent of the system's cost. The federal tax credit can be applied to the remaining 60 percent.

GRASP and PEC I will be presenting an introduction to solar hot water heating at the Montgomery County 4-H Center in Lansdale on September 13 from 7 to 8:30 p.m. The seminar will cover the types of solar hot water systems currently available, the costs and expected savings associated with the systems and

installation and maintenance considerations. A primary focus will be how to apply for the Solar Bank grant and the tax credit.

The seminar will be presented by Tom Lent and Barry Davis, GRASP members. Tom Lent is an experienced solar technician who has worked with the Franklin Institute Solar Center and the Philadelphia Solar Planning Project. Barry Davis is an energy consultant and energy program manager. Tom and Barry recently presented two very successful all-day workshops on how to build or buy a "batch" solar system at the Peace Valley and Schuylkill Valley Nature Centers. They also presented solar seminars at the Philadelphia Home Show.

The workshop is being held in cooperation with the Montgomery County extension service. To register, contact Extension office at 277-0574.

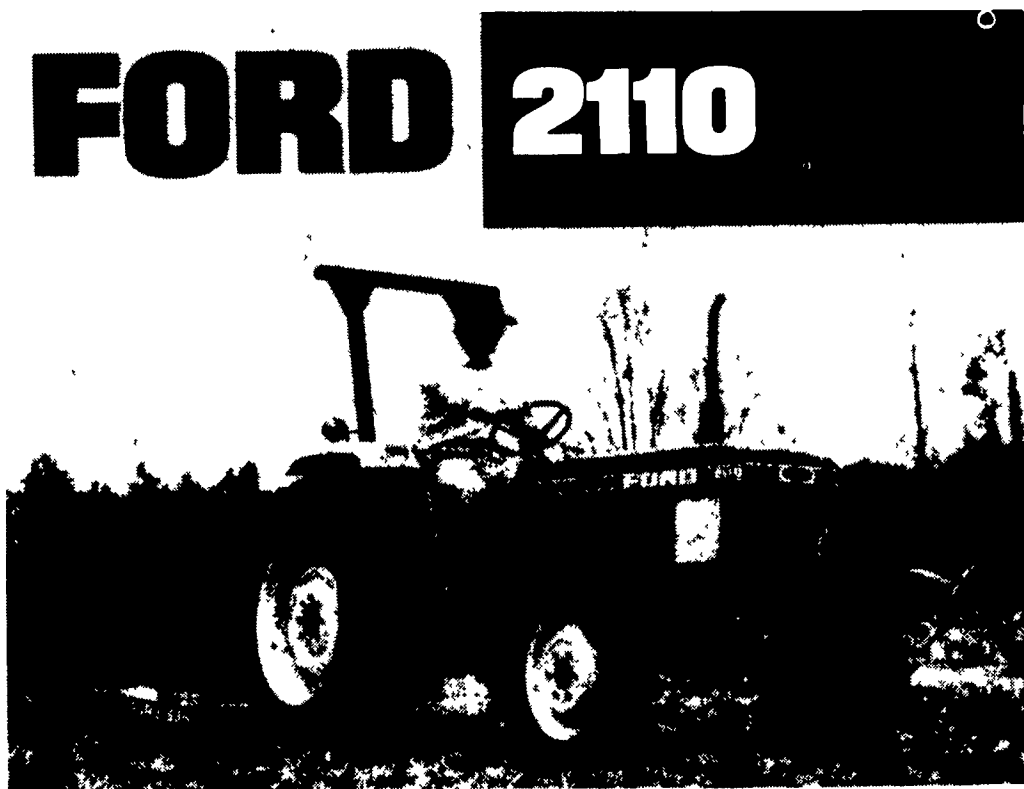

(Penn State is an affirmative action, equal opportunity employer.)

**Waiver Of Finance On New Ford 1000 Series To The Largest 4WD TW Farm Tractors, Effective Till March 1, 1985 Or 9 3/4% Financing Or Large Cash Rebates.**

**All Used Farm Tractors 9% Financing Or Waiver Of Finance Till March 1, 1985**

**See The New Ford Tractors  
In Stock And Ready To Go!**

**FORD 2110**

**PULL  
AHEAD!**

**Ford TW with front-wheel drive.**

Come see the great new Ford TW Series. Four models, from 105 to 170 PTO horsepower. They're the toughest, most powerful tractors Ford has ever built. And, they can be equipped with front-wheel drive.

**Cut tillage time and fuel consumption by up to 20%!**

Tests prove front-wheel drive could cut tillage time and fuel consumption by up to 20% on a per acre basis, depending on tractive conditions. That means you could pack 12 hours of work into a 10-hour day...on 10 hours worth of fuel, depending on your conditions! And, the Ford mechanical front-wheel drive system offers many other advantages:

- Tight, maneuverable 50-degree turning angle
- On-the-go engagement
- Automatic limited-slip differential
- Rugged construction

**Plus... TW-5, TW-15, TW-25 and TW-35 tractors feature FREE TRACTOR CARE. For the first three years or 2,500 operating hours virtually all you'll buy is fuel and fluids for replenishment. Ask us about this comprehensive warranty and maintenance program.**

**CLOSEOUT SPECIALS ON ALL 1984 FORD LAWN & GARDEN TRACTORS**

## LOTS OF MUSCLE FOR THE MONEY!

The new Ford 2110 is economical to own, operate and maintain. Yet with 34 PTO horsepower and an amazing number of standard features, it can handle just about any kind of work you've got to do.

**Economical diesel power.** The 4 cylinder diesel engine delivers an honest 34 horsepower. Precision balancing, lightweight pistons and a barrel and plunger type in-line fuel injection pump contribute to smooth, efficient performance. Standard glow plugs make for quick cold weather starting.

**The standard transmission** offers 12 forward and 4 reverse speeds. Compare that to the competition. If you frequently shuttle from forward to reverse, specify the Synchronized

Manual Shuttle (SMS) option. Double reduction final drive live 540 rpm PTO, sealed brakes and a foot operated differential lock round out this excellent powertrain. Mechanical front wheel drive is optional.

**Powerful 8.6 gpm hydraulics** offer more capacity than the competition. There's plenty of power to make full use of the standard Category I three point hitch. And with the optional two spool remote valve, you can quickly and smoothly operate remote cylinders. Top link draft sensing for the three point hitch is standard. The power steering pump is independent of the hydraulic pump, so full hydraulic capacity is available to the remotes and three point hitch.

**A pleasure to work.** The well padded seat adjusts to fit the operator. Controls are close at hand and easy to use. Instrumentation includes a temperature and fuel gauge, tachometer, hourmeter and warning lights. The handy foot throttle is one of many other standard conveniences.

The 2110 is simple to service, too. Fuel and coolant can be added without raising the hood. The entire hood tilts forward for engine access. Grease fittings, oil filter and the dry element air cleaner are easy to reach.

The new Ford 2110 proves you don't have to sacrifice performance and features to get an economical tractor. Test one. It might just be the Ford for you.
