MAY-CO SILO LINERS

1. Reduces runoff
2. Wetter silage packs tighter
3. Tighter packed silage ferments better and makes more lactic acid.
4. Lactic acid increases T.D.N.
5. Is more palatable
6. Reduces shrinkage
7. Does not heat
8. Does not mold
9. Does not spoil in hot weather while feeding
10. More digestible protein
11. Acid does not eat silo walls
13. You don't need an additive
14. Easy installation

Our new liners are made with 3 plys of plastic laminated together with a reinforced top edge and makes a strong light weight plastic tube much STRONGER than regular polyethylene sheeting.

For More Information:
MAY-CO SUPPLY CO. INC.
430 Biscayne Rd.
Lancaster, PA 17601
717-569-1011

Silo Diameter	10'	12'	14'	16'	18'	20'
Cost of liner only at 40' in length	133.35	168.00	184.80	218.40	243.60	268.80
Cost of each additional 10' of liner	32.55	42.00	46.00	54.60	60.90	67.20
Cost of lifting ring and clamps	88.30	97.98	105.42	208.62	235.12	254.92

Ring and clamp cost for 10, 12 and 14 ft. silos with unloader are about 75% higher.
Order 10 extra feet of liner if you wish to tie the bottom of the liner shut.

Please send liner only
Please send liner, lifting ring and clamp
I am sending \$ _____ to receive liner freight free.
Orders must be in by August 1st to ensure right size and length.

LONG'S CORRUGLASS™ BINS FOR HIGH MOISTURE GRAIN STORAGE

Long incorporates the strength of corrugated steel with the protective coating of glass to produce the most affordable, glass lined, oxygen limiting storage system for high moisture grain that you can buy. This feed system allows live stock growers to carry more animals on the same number of acres.

HIGH MOISTURE GRAIN IS MORE DIGESTIBLE, MORE PALATABLE, AND MORE NUTRITIOUS

The controlled fermentation process helps livestock to utilize more of the nutrients available in the feed. The high moisture feed also tastes better, and helps to obtain greater milk production and weight gain at a more economical cost.

OTHER FEATURES
Glass fused to steel wall and roof panels for maximum protection
Corrugated, glass fused to steel wall sheets with exterior stiffeners provide extra strength
Radius drawn-roof with 30.5 degree pitch offers extra strength against snow build up

OXYGEN LIMITING BREATHER SYSTEM PROTECTS FEED AND CONTROLS THE FERMENTATION PROCESS

Breather bags suspended in the roof of the bin provide an oxygen limiting environment for the feed. This oxygen limiting feature controls the amount of fermentation that takes place within the bin. Feed stays fresh longer, feed losses are cut — both quality and quantity, and the need for drying equipment and heater fuel is eliminated.

BOTTOM UNLOADING SYSTEMS

Bottom unloading systems feature proven dependability and low maintenance cost. Your choice of tapered, power driven sweep auger to help prevent bridging and cavities, or standard 6" auger unloader with clean out sweep arm.
