Brockett's Ag Advice

By John E. Brockett
 Farm Management Agent
 Lewistown Extension Office

This column will probably be relevant to only a few of my reading audience. However, some of you may read it and use the ideas for friends, family members, or acquaintances.

The first thing a surviving spouse should do is nothing. Wait until you can think more clearly. Once you can begin to function, then begin to plan for the future. Let's explore a few of the things you will need to consider.

Appraisal

Some people feel that an appraisal should only be done if there are taxes to be paid. Don't listen to them. An appraisal should be made even if there will be no taxes to pay. It can accomplish several purposes. (1) It will probably result in saved income taxes in the future - the appraisal sets a new value on everything, which you can use for depreciation or as a cost basis in case of a sale. (2) It will give you a value for your property in case you want to sell it or to help you and your attorney plan your estate in the future. (3) It may help you make some insurance and business decisions. If you do get an appraisal, treat it as a very important document. File it with your other valuable papers.

Insurance

You will receive conflicting advice on this issue. Should you or should you not get insurance on yourself? The insurance agent will say yes, but he is suspect because he or she sells the product. Some well-meaning friend or family member will say no because you should preserve all of your money. The actual answer is not clear cut. Different circumstances would yield different answers.

Here are some instances where the answer would be an unqualified yes with the only debatable point being "how much." (1) You have dependent children including handicapped adult children - the insurance could be used to fund a trust to help support them. (2) Your farm still has a sizable debt load - insurance could be used to pay it off if you died. (3) The size of your net estate was such that there

would be a tax burden if you died - insurance would pay this tax.

Here are some where insurance would be useful. (1) You have several children with one of them to get the farm, but your desire is to have that child buy it from the other children - insurance could provide a solution. (2) You want all of your children to receive an inheritance but your only asset is the farm - again insurance could provide a solution.

What about instances where insurance is probably unnecessary? (1) Your children are grown and the farm will be sold now or after your death. (2) A child is already buying the farm and you have the mortgage to leave to other heirs. (3) You have other liquid assets to leave to your children.

A New Will

The will should be revised. There are new needs to be met. Are you comfortable with the guardians you have selected for the children? Is the child who is now operating the farm mature enough to handle things if you die?

The Business

This is one of the biggest decisions. It is also the one on which you will receive the least help. You'll get a lot of advice, but most of it will be irrelevant to your needs. Talk to your accountant (if you have one). Your county agent may be able to help or may know of a specialist who could help. Your biggest decisions are: (1) Should I continue to operate the farm, (2) Should I offer a child a job or a partnership or part of the business, (3) Should I hire someone to take the deceased spouse's place in the business, (4) Should I pay off all debts with the insurance money I receive, (5) Should I put savings or insurance money into the business to keep it going - if so, for how long? Unfortunately there are no easy answers to these questions. Each family, each situation has its own unique set of alternatives. One piece of advice is to not run the business on emotion or continue it out of sentiment.

Eliminate Fencing Problems

WITH

ARC
 SOLAR FENCING

"The Arc 12 Solar system allows us to safely run our stallions next to the mares eliminating time and labor on try backs
 Harold S. Warder Quality Quarter Horses Oskaloosa Iowa

- Eliminates fence sagging
- No staples or wire clips
- Adjustable enclosed spring assembly for each wire
- Optional site rails™
- Optional Arc 110 Volt multi wire unit
- Installed by trained dealers
- Fully guaranteed by warranty

The ARC 12 Fence is a new concept in livestock fencing. Using free energy from the sun, the solar powered solid state unit keeps a powerful 12 volt battery charged for effective shocking. Special non-conductive white plastic posts are attractive and extremely durable, capable of being bent 45° and returning to their original position. Using smooth 12½ gauge high tensile wire eliminates injuries from barbed wire.
