

**For 58 years,  
we've been making  
improvements.  
And for your farm,  
these are the  
best hybrids ever.**

## **3378**

By going with **3378**, you can be sure your corn will stand up to the hardships of the toughest growing seasons. Outstanding staygreen, good tolerance to prevalent diseases and excellent standability make **3378** one heck of a defensive hybrid. And strong emergence and early vigor mean it's also a prime candidate for reduced tillage. On most soil types and under a wide variety of conditions, **3378** will come through with the returns you're after.

## **3358**

Growers in the east are going to be harvesting a lot of grain when they plant this outstanding hybrid. In 498 side-by-side comparisons over three years, **3358** averaged 7.2 bushels per acre more than the competition. Take a yield advantage like that together with excellent tolerance to leaf and stalk disease, ease of combining and good grain texture, and you've got one great performer.

## **3184**

Here is a hybrid that's made a lot of friends. **3184** adapts to most any soil type and farming practice and shows a high rating for seedling vigor, drought tolerance and stalk quality. But what you'll really like are the top-notch yields you get from this dependable producer. In good years and not-so-good, **3184** still puts out the yields. The superior performance of **3184** makes it a "must plant" hybrid for this season.
