BUTLER Livestock Systems
builds performance leaders

Protected against rust inside and out

For barn equipment that stays looking good and working harder for years longer than painted equipment, check out our Butler Livestock Systems line. Stalls, pens, stanchions and accessories all are hot-dip galvanized to put proven rust protection over every inch of surface, inside and out. Can't chip away like paint. See us for the performance leaders... in systems and service.

Fast, Efficient, Dependable.

The Stormor EZZE-DRY® Grain Drying System.

The EZZE-DRY has proven itself fast, efficient, and dependable, for more than 15 years. Drying capacities are available up to 2,000 bu./hr. at 5 points removal, and it doubles as a storage bin after drying is complete. The thin drying layer and high volume low heat airflow ensures uniform drying. And, the EZZE-DRY is virtually maintenance free.

Mr. Dairyman If You Are Interested In Saving Energy Or If You Are Having A Cooling Problem, Please Call us For A No Obligation Demonstration

The Mueller Accu-Therm™ Precooler

... uses well water to precool your warm milk before it goes into your milk cooler!

In seconds, 100 degree milk is cooled to within 15 to 20 degrees of well water temperature. Milk flows between every other stainless steel heat exchanger plate while well water flows in the opposite direction on the other side of these plates cooling the milk. Choose Accu-Therm for lowest cost precooling when well water is plentiful and water disposal is practical!

FOUR REASONS WHY YOU SHOULD HAVE A MUELLER ACCU-THERM PRECOOLER ON YOUR FARM!

- 1 Reduces Energy Cost**
Milk from the cow is about 100 degrees F. Precooling milk by 20 degrees shortens the time the milk cooler refrigeration system must operate by one third. Precooling warm milk by 30 degrees will cut your milk refrigeration system operation in half. A Mueller Accu-Therm lowers your energy costs and reduces your operation expenses.
- 2 Flexibility**
The Accu-Therm is available in wall mounted or floor models to fit any milking operation or space restriction. As your dairy operation grows, Accu-Therm can be easily adapted to increased volume by adding heat exchanger plates. This is a simple job requiring only a hand wrench and a few minutes and does not require moving the Accu-Therm.
- 3 Low Maintenance**
The Accu-Therm Plate Heat Exchanger is a closed system and can be quickly and efficiently cleaned in place with the rest of the milking system.
- 4 Pays For Itself**
The money you save in reduced energy costs will soon repay your investment in a Mueller Accu-Therm milk precooler. For example, with 80 degree F. well water for cooling milk temperature is lowered by 20 degrees and energy requirements are reduced one third. The typical 5 HP milk cooler condensing unit uses approximately 5 kilowatts per hour of electricity.

MUELLER Accu-Therm PLATE HEAT EXCHANGER

**MOJONNIER PARTS AVAILABLE
USED COOLERS AVAILABLE**

- 1,000 & 3,000 Gal. Mueller
- 300, 400 & 500 Gal. Mojonnier
- 400 Gal. Girton
- Various Types of Inexpensive Tanks!
