

# NEW IDEA

5 Models from  
155 to 550 Bushels

## SPREADERS Heal Themselves

Scratch the painted metal surface of most spreaders and you have an "open wound" subject to corrosion and rust-through.

Scratch the galvanized surface of a New Idea spreader and the healing process of galvanic action begins. A layer of zinc oxide quickly forms to create a protective barrier.

Paint is a surface coating. Galvanizing bonds zinc into the steel electrochemically to protect up to 25 times better than no coating at all... which is what you have when you scratch a painted metal surface.

This long-life spreader box protection is available only on the complete line of New Idea conveyor spreaders. It is another reason why you can rely on New Idea spreaders.

For more information on this "New Idea" in manure handling equipment, see us today!
