

Ag-Chem's pickup sprayer tanks come in 300 or 400-gallon capacities.

## Ag-Chem markets convenient pickup sprayers

MINNEAPOLIS, Minn. — Ag-Chem Equipment Co., Inc. introduces a skid-mounted pick-up sprayer in either 300 or 400-gallon rated capacities. The SK-300 or SK-400 feature elliptical shaped poly tanks that provide increased operator visibility, and easy-access filling with a large 10-inch fillwell.

The "C" section full-length tank saddle measures 9 1/4"x2"x3/16" thick. Standard equipment also includes a Scot centrifugal pump driven by a 5 hp Briggs & Stratton engine, 7-way boom control valve, and a heavy-duty 40' truss type boom. The boom is equipped with chemical resistant EPDM rubber product hose and features adjustable nozzle spacings.

The SK-300 and SK-400 pick-up mounted sprayers straddle post-emerge crop rows — and apply on

pre-emerge broadcast fields. Getting from field to field is easy with the convenience of your pick-up truck. More information is available from Ag-Chem Equipment Co., Inc., Industrial Park, Jackson, Minnesota 56143, phone 507/847-2690.

## Pacific Scientific introduces forage/grain tester system

SILVER SPRING, Md. — Pacific Scientific introduces a new Model 6250 NIR spectrophotometer system tailored for the researcher interested in analyzing forages, feed and feed ingredients for nutritional content.

Software was developed by Infracsoft International, a company headed by Dr. John S. Shenk, Professor, The Pennsylvania State University, and an international authority on NIR measurement.

The system enables researchers to develop calibrations for use in predicting protein, fiber, dry matter, and other properties of forage and feed samples, in seconds. No chemical reagents are required to prepare samples for test. Factory installed calibrations for hay, haylage, corn silage, corn grain and soymeal are also available for the system. Protein, dry matter, ADF, Ca, K, P and Mg are measured simultaneously at the touch of a computer key and printed reports issued.

For further information on the Model 6250 NIR Forage Tester,

please contact the Gardner/Neotec Scientific Company, Attention: Instrument Division, Pacific Linda Newberry (301) 495-7000.

Pacific Scientific's new Model 6250 is designed to work with the IBM PC-XT/AT or Northstar Advantage computers.

# Alfalfa growers demand the best.

Alfalfa growers expect the most from their alfalfa variety. Like the highest yield, the best quality and multiple pest resistance. That's why more and more growers are planting Cimarron Alfalfa.

Profit with a proven variety. Cimarron is consistently a top producing alfalfa, both on the farm and in university tests — not only in total yield but in crude protein content and TDN. It's an extra leafy/full season variety with excellent stand persistence.

Cimarron offers resistance to a broad spectrum of diseases and insects such as Phytophthora root rot, bacterial wilt, Fusarium wilt, anthracnose, Sclerotinia crown and stem rot, Stemphylium leaf spot, common leaf spot, pea aphids, spotted alfalfa aphids and the alfalfa weevil. No other variety can match Cimarron's combined pest resistance.

High yield... extra leafiness... excellent quality... multiple pest resistance.

Shouldn't you demand Cimarron?
