## Rugged And Reliable

### CONVEYORS

**BIG  
CAPACITY...  
FAST  
DELIVERY...**

Model 166-A

Model 162-A

Built rugged for efficient, high-volume feed handling. Economical chain-and-flite action moves feed smoothly without sifting or separating.

### New Low Cost Conveyor

- High capacity.
- Lengths: Up to 25 feet.
- All-belt drive for low maintenance.
- Galvanized steel, all bolted construction.
- Detachable steel chain with steel-braced 2½in. rubber flites.
- Replaceable bolt-in conveyor pans.
- Options: hopper, spouts, diverter, support brackets

### SAFETY NOTICE

#### Patz Silo Unloader

**ATTENTION:** Owners of Patz Silo Unloader Models 61, 66 and 98 manufactured from 1960 to 1971 (14 to 25 years old). All models involved were originally green

State of the art guarding at the time of manufacture may not fully cover the area of the gathering chain. Although the unloader should not be operated with persons in the silo, serious injuries caused by the gathering chain while ignoring this safety practice have been reported. To help prevent accidents that may result in injury or death, Patz offers owners of unloaders involved, three options that provide improved gathering chain guarding.

**Option 1.** For unloaders already converted to the big (30") drive wheels, Patz will provide improved guarding for the gathering chain at no cost to the user

**Option 2.** For unloaders having original small (18") drive wheels, Patz will provide improved guarding at no cost, but it **will require** the purchase and installation of the big (30") drive wheel kit, which will improve traction, and flotation. The improved guarding **will not** work with the small (18") drive wheels

**Option 3.** Patz will pay U S \$400 directly to the owner who buys a new Patz Silo Unloader with its new up-to-date features. Owners can keep their present unloader's motor, electrical joint and electric cable. This further reduces the price, making the new Patz Unloader more affordable. Patz will send payment when verification of installation is furnished and old unloader is returned to Patz

If you presently own a Patz Unloader Model 61, 66 or 98, manufactured from 1960-1971, for your protection contact us today

**CAUTION:** Silos may contain poisonous gases. Proper precaution should be taken before entering. Entering the silo without locking out the electrical power could result in serious injury or death if power is turned on while anyone is in the silo

Ring drive

Surface drive

## Reliable Feeding

Hard-packed and frozen silage makes feeding more than a routine chore.

Patz gives you two solutions to the problem — the RD-820 ring-drive silo unloader and the 98B surface-drive silo unloader. Both have a double-hook gathering chain with hardened steel cutters and claws that cut through frozen and packed silage.

- Spring-tensioned powered cutter keeps silo walls free of buildup.
- Preset depth-of-cut control makes feeding truly automatic (98B).
- Powerful blowers with adjustable impeller blades do the job.

We'll show you how to get the most performance for your money.
