

BANDED OR IN-FURROW COUNTER.[®] BROADEST-SPECTRUM INSECT CONTROL. GUARANTEED.

Conservation tillage is helping save valuable topsoil from erosion. But trash on the surface provides a home for a complex of pests waiting to attack your corn crop. So you need protection that's best for today's conservation tillage practices.

Choice Of Application

COUNTER[®] systemic insecticide-nematicide is right for conservation tillage, applied banded or in-furrow.

In-furrow, COUNTER cuts through the clutter, and concentrates protection where it can't be diffused by heavy trash or blown away. In cleaner fields, COUNTER is a natural for banded application. But either way, COUNTER delivers the broadest-spectrum control you can get.

Guaranteed Seed Safe
COUNTER is tough on corn pests, but won't harm your seed, even applied in-furrow. Guaranteed.

CORN PESTS CONTROLLED—IN-FURROW APPLICATION											
	Corn Earworms	Seed Corn Weevils	Seed Corn Beetles	Wireworms	Symptomyia	White Grubs	Fire Beetles	Billbugs	Cutworms	Nematodes	Leaf-Eating Beetles

Always read and follow label directions carefully.

Guaranteed Broadest Spectrum Control

COUNTER controls more major corn pests with no known resistance. Since 1975, university tests in the Corn Belt have shown COUNTER, banded or in-furrow, to be the most effective corn insecticide available. And COUNTER delivers cutworm suppression. Guaranteed.

Two-Way Protection

COUNTER works on contact to control pests in the soil, and systemically, for early-season protection throughout the plant. So your crop gets off to a fast start for a strong, even stand.

COUNTER Flexibility

Whatever your cultural practices, conventional or conservation tillage, banded or in-furrow application, COUNTER delivers the best protection against the complex of pests that attack your corn crop. Guaranteed.
