PASTURE MAINTENANCE — 50 minutes grass with 300 lbs of fertilizer. 150 lbs of urea out dirt. 150 lbs of urea out dirt. 150 lbs of urea out dirt.

PASTURE RENOVATION at Low Cost — If the soil is too hard, the grass will not grow. Destroying the old grass with a harrow will break up the soil and allow the new grass to grow.

TILLAGE — Break up the soil and allow the new grass to grow.

• 8 Foot Must Order \$485.00 • 10 Foot In Stock \$632.00 • Used 12 Foot \$389.00

OR GO WITH THE FOLDING

THE FUERST F-L-E-X-I-B-L-E TINE HARROW/CART

Improves Your Herbicide Performance!

- Eliminates a pass over your fields. All for a minimum investment
- Requires little additional power. Harrow Cart moves quickly from field to field. 16 to 30 foot widths
- Levels and prepares ideal seedbed

You don't need expensive implements to incorporate herbicides!

Work done by several chemical companies and universities demonstrates how effective the Fuerst Flexible Tine Harrow is behind cultivators or disks. In essence, farmers are getting two incorporations in one pass with the bonus of outstanding leveling and an excellent seedbed.

One Pass Incorporation Strategy

The Fuerst Harrow, carried on a Fuerst Harrow Cart, retains its flexibility when in use, assuring same depth incorporation throughout. Behind your cultivator or disk you can expect to get good results of incorporating and leveling even on "risky" fields. Eleven rows of unique 3 inch long spreading action™ tines are linked together in a blanket like manner. With no rigid frame the harrow is able to snake snugly over the contours of the ground. The special tines are the key to the success of the Fuerst Hercules Harrow for incorporating, and leveling, achieving optimum results at 6 to 8 mph.

- The Harrow Cart is rugged and follows tight turns behind a disk or cultivator, wiping out wheel tracks as it goes.
- The folding wings make transport simple. The harrow can be transported directly behind disk or cultivator.
