# Badger Structures A Quality Alternative

**Badger Northland "beats the blues" with the introduction of three better investments that will save you time, money, feed, fuel and fertilizer.**

For over 35 years, Badger Northland has set the standards by producing farm equipment systems that livestock farmers need to run their operations efficiently and profitably. And they're setting the standards again with forage, grain and manure storage systems built with the same quality that has made all Badger Equipment so popular with farmers everywhere.

**Forage or grain, there's a Badger structure to fit your needs.**

Now, more than ever, production costs must be controlled, and storing haylage in a new Badger structure is the best way. Now you can harvest haylage in its "prime", blow it into a Badger structure and trap all the nutrients you've worked so hard to produce.

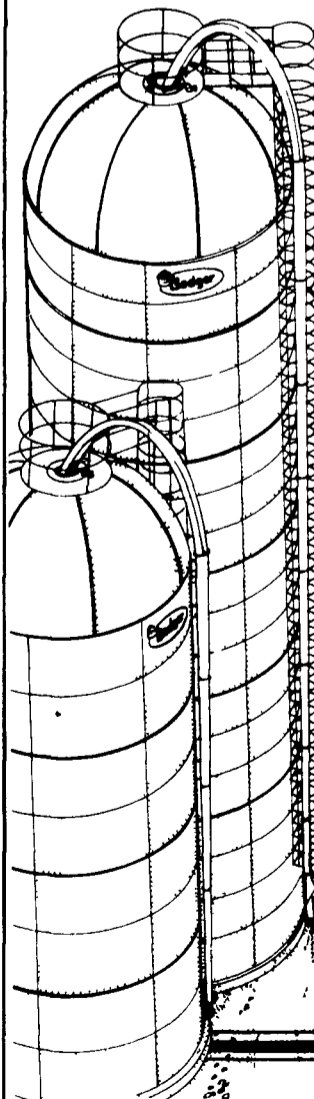

And while you're saving, skip the dryer next year with a Badger High Moisture Grain Storage System. You'll harvest earlier and reduce field losses due to poor conditions.

**Say goodbye to daily hauling with an energy efficient Badger manure storage structure.**

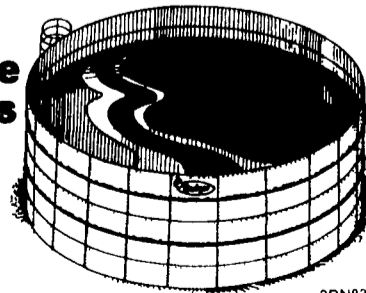

Manure is a valuable resource, too valuable to waste. That's why a new Badger Manure Storage Structure makes sense now! You'll be surprised at the payback you'll get in fertilizer cost savings, fuel and time not to mention doing away with the hassle of daily hauling.

Badger Manure Storage Structures are built to last. They meet or exceed U.S. Soil Conservation Service Standards that call for a minimum 20 year life span.

**See your Badger Dealer now for all of your feed, forage and manure handling needs. He's your local parts and service expert too!**

**Setting the Standards**
