NEW from CHORE-TIME

20" deep SSS curtain back cage layer system

- Ideal for new construction or modernizing older cage houses
- Boosts density of old stair step houses by up to 125% or more
- Boosts density of old 3-high houses by up to 33% or more
- Famous Galv-A-Weld cage construction with 10-year pro-rated warranty

Get The Only New Technology Available For Cage Systems

Chore-Time's new 20" deep SSS 4-high system puts 33% more birds into the same row lengths as old style 3-high systems - without dropping boards and without a need for greater building width. That means at 6 birds per 16"x20" cage (53.3 square inches) a 52'x536' building can house over 108,000 birds.

But, just as important, with this Chore-Time system you also don't have to sacrifice the features and benefits you've come to expect from Chore-Time: single file egg belt, our all galvanized, SOFT TOUCH® II egg collection, a gentle cage floor slope to prevent checks and cracks...rugged A-frame cage support and legs every 4 feet to protect against cage sag and trough

wear and Galv-A-Weld (welded black then galvanized) cage construction for long, trouble-free life... a choice of feeding systems to help you take control of feed costs: Meal Master Feedkar (traveling feed hopper), M.T. (rotating Flex Auger), and NEW Ultraflex (80 ft. per minute circulating Flex Auger).

And, with Chore-Time feeding systems you can take full advantage of the new production-boosting, feed-saving MEAL-TIME® feeding method developed by Chore-Time. Our feeding systems are designed to minimize waste and provide each bird with fresh, Un-Picked-Over feed.
