May-Co Silo Liners

In fermenting crops, such as alfalfa, corn, sorghum and high moisture grains, certain bacteria change carbohydrates into organic acids, principally lactic and acetic acids. These acids are nature's own food preservatives and mold inhibitors. When enough of these milk acids are produced, the fermentation stops and the feed is preserved. However, the bacteria that make these organic acids do not grow in the presence of oxygen. The flow of oxygen can be eliminated by installing a MAY-CO SILO LINER inside your silo, which also eliminates juice run-off. In an oxygen free ferment, the silage will not freeze to the silo wall, will not shrink, will not mold or heat between feeding even in hot weather, and will produce more T.D.N and Digestible Protein without an additive.

ATTENTION FARMERS
Country Ag Service welcomes you to an old fashioned building here.

Everyone always wondered just how good a pre-owned Harvester® System is. Now you can come see, inspect and actually watch our experienced crew erect a pre owned structure!

We invite you, your family and friends to come to the job site and see our Bolts, Air Bags, Sealer, Gaskets or whatever interests you. Our staff will be there to answer questions and help you see the advantages of Glass Lined sealed storage and proper feeding programs. Please feel free to come and bring some friends. We are proud of our work and want to show it to you.

ATTENTION FARMERS
Keep your milk flow in production. Bring your cows into the barn at noon time. Turn on the fan. Keep them cool, and let the air flow keep the flies off, too.
