Got A Taste For Barbecue: What You Need

Barbecuing, whether on a picnic or simply in your backyard, makes food taste great. The family cookout has become a popular American tradition. But two things can spoil an outing: getting sick and getting hurt. You can avoid both with some know-how about food and fun outdoors.

The grill itself should be sturdy and stable, especially if it stands on legs. Very lightweight grills can become top-heavy in use and topple over. A hood or windshield is a great help in controlling irritating smoke and minimizing dangerous wind-driven sparks.

Whatever type of grill you have, placed it so that sparks and smoke won't fly toward buildings, furniture or people. Don't barbecue in a confined space. Set up the grill in an open area away from buildings and shrubbery, and out of the traffic pattern so it won't be bumped or tipped over by children or pets.

Prevent burns and protect your clothing with an apron and potholder-type gloves. You'll also want a long-handled set of barbecue tools: knife, fork, tongs, turner, spoon, pastry brush, skewers, fire rake, and even long-handled salt and pepper shakers.

Fiberglass Tub And Shower Care

Fiberglass bathtubs and showers bring advantages and disadvantages to home care. On the porous side, fiberglass is practically unaffected by chemicals and it is resistant to mildew. Unfortunately, fiberglass generally requires more maintenance than

the glazed porcelain or ceramic tile units. Fiberglass is softer and more porous than porcelain and therefore it is more easily damaged or scratched.

The key to success in keeping fiberglass tubs and showers clean is frequent cleaning (weekly). Avoid damage with harsh abrasive cleansers or scouring pads as these will roughen the surface and give dirt and place to cling in the tiny scratches. Not even soft scrub cleaners are recommended for fiberglass. Because damaged surfaces collect the dirt fast and the dirt is difficult to remove easily, you will have some difficulty using anything with complete success.

The fiberglass tub or shower can be cleaned with dishwashing liquid and water or with a disinfectant spray or foam cleaner, rinsed and dried. Keep it maintained and do not let the soap scum build up until it is a major problem. Use of a 10- and 12-inch squeegee to keep the walls clean and dry after bathing will help keep the fixture free of soap scum and hard water buildup.

If a stubborn ring appears, try using a paste made from automatic dishwashing detergent

or a non-precipitating water softener as a cleaning agent. Leave the paste mixture on the spots for a longer period of time. Rinse and dry.

Use of a disinfectant cleaner should eliminate the soap scum problem with regular cleaning. A white nylon scrub brush or sponge can be used without scratching. For heavy soap scum, a mild organic acid cleaner can be used if it is rinsed off quickly. A vinegar solution (four parts water to one part vinegar) can be used. Rinse with clear water and buff dry with a soft cloth.

In hard water areas, a mineral deposit may build up. There are products available that are specifically designed to remove such deposits. Package instructions should be read and followed carefully.

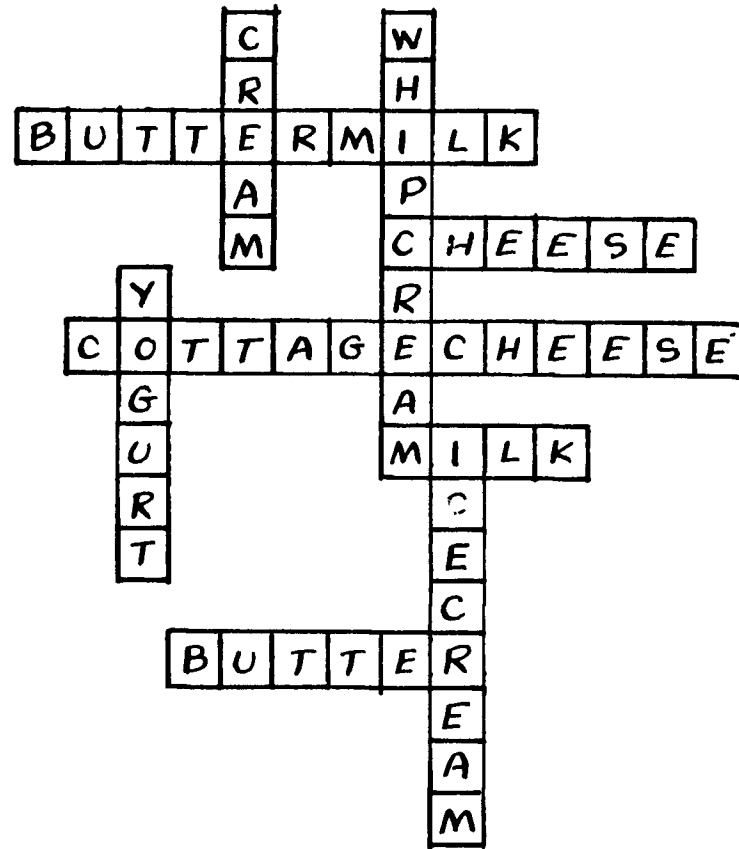

If the soap scum problem continues in spite of regular cleaning with a disinfectant cleaner, waxing a cleaned fixture will aid future cleanings. Waxing the sides with a cream appliance wax or paste wax will help to repel hard water buildup. Remember to only wax the sides as waxing the bottom will create a safety hazard.

If the fiberglass unit has been excessively scoured and scratched, an auto rubbing compound will polish it (but not like new). Apply an automotive white polishing compound with a clean cloth to any scratched or dulled areas. Then buff the surfaces with a light application of an automotive white cream wax using a clean cloth. This treatment may need to be done about twice a year in order to maintain an attractive finish which will be easy to clean.

Little Lions FFA

The Little Lions FFA chapter recently elected officers. The new officers are president, Joyce Harpster; vice president, Jeff Martin; secretary, Stefanie Brown; treasurer, Shawn Kauffman; reporter, Emily Peters; chaplain, Tammy McTavish; parliamentarian, Bobby Rider; and sentinel, Randy Dreibelbis.
