# You can bet on the spread from Hedlund-Martin

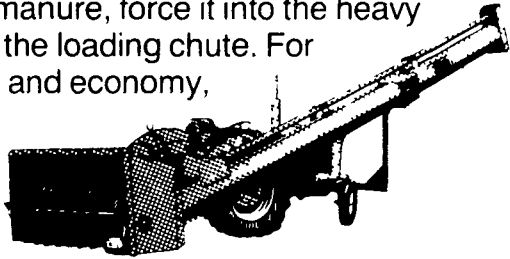

## Equipment to solve your manure handling problems.

Save your time and money by using machinery designed to bridge the gap between liquid and solid manure handling:

### The Equalizer

Loads manure too thick to pump and too thin to bucket. Powerful blades in the scoop break up the most crusted manure, force it into the heavy auger, and up the loading chute. For loading power and economy, there's nothing like the Equalizer.

### The Vanguard

Hauls liquid and semi-solid manure fast, up to 600 gallons per minute. Capacities range from 1575 to 3300 gallons. With the Vanguard you get a low cost-to-capacity ratio, low maintenance, and extra heavy construction for years of tough use.

### The Scavenger II

The ultimate machine to handle all your manure, year 'round. Handles liquids, semi-solids, pen or pack, even frozen manure. It unloads faster and uses less horsepower than a flail spreader. The Scavenger II is built with heavy duty chain drive and rugged construction throughout. You'll get an even spread up to 50 feet wide. Your first glance will tell you the Scavenger II is unlike any spreader you've ever seen.
