

## Harding reelected as AGCC director

DENVER, CO — Janet Harding of RD 4, in Brookville, was re-elected to the Board of Directors of the American Guernsey Cattle Club (AGCC) at the AGCC's annual meeting in Denver, Colorado. Since her election to the Board in 1980, she has served as chairman of the Youth/Promotion/Journal Committee.

Harding is currently employed by the Pennsylvania Dairy Promotion Service, Inc. Other involvements have included the presidency of the local school board, co-chairmanship of the Pennsylvania GBA youth committee, directorship of Guernsey Restaurants, Inc., chairmanship of her county's annual Ice Cream/Strawberry Festival and membership in the Dairy Shrine Club.

This past spring, she married Charles Ruslage of Clarion. She was formerly married to the late C. Eugene Harding of Maplevue Farm.

Born in New York City, Harding moved with her family to Montclair, New Jersey. After graduating from Vassar College in 1951 and taking a dairy short course at Rutgers University, she began her career in the dairy industry. She started out working with the Dutchess County, New York Cooperative Extension Service.

For the next two years she worked with the New Jersey Guernsey Breeders' Association (GBA) to coordinate Guernsey and Golden Guernsey activities. From 1954 through 1958 Harding coordinated sales campaigns and promotions for Golden Guernsey, Inc.

With this election, Harding will begin her second five-year term on the AGCC Board of Directors.

EASTON — Nearly 500 people spent last Sunday dipping their derrieres in the Delaware River as part of the "Dairy-Ere in the Delaware," a tube float dairy promotion that benefitted the Easton Chapter of the Red Cross.

The Pennsylvania Dairy Promotion Program was the major sponsor of the event and conducted two contests to tie milk and dairy products into the event. There was a milk carton raft contest and a "Big Cheese Contest" to see who had the best dairy decorated tube. Another contest required people to guess the number of eight-ounce glasses of milk a cow produces in a year.

Opening ceremonies were held at Eddyside Beach near Easton with Pennsylvania dairy princess Lynette Loper and Northampton County dairy princess Janet Poliskiewicz participating. Also taking part were the mayors of

Easton, Allentown and Bethlehem. One mayor's inner tube was christened with a quart of milk at the start of the float.

The Northampton Dairy Promotion Committee served free milk to all floaters and provided a

display of dairy cows on the grounds. Many dairy products, including white, chocolate and strawberry milk, yogurt, milkshakes, ice cream, and cheese and fruit baskets were also available.

Pennsylvania dairy princess Lynette Loper, left, and Northampton County dairy princess Janet Poliskiewicz, pause to chat with a fuzzy friend.

## NEW from CHORE-TIME

### 20" deep SSS curtain back cage layer system

- Ideal for new construction or modernizing older cage houses
- Boosts density of old stair step houses by up to 125% or more
- Boosts density of old 3-high houses by up to 33% or more
- Famous Galv-A-Weld cage construction with 10-year pro-rated warranty

3-high model available

### Get The Only New Technology Available For Cage Systems

Chore-Time's new 20" deep SSS 4-high system puts 33% more birds into the same row lengths as old style 3-high systems - without dropping boards and without a need for greater building width. That means at 6 birds per 16"x20" cage (53.3 square inches) a 52'x536' building can house over 108,000 birds.

But, just as important, with this Chore-Time system you also don't have to sacrifice the features and benefits you've come to expect from Chore-Time: single file egg belt, our all galvanized, SOFT TOUCH® II egg collection, a gentle cage floor slope to prevent checks and cracks...rugged A-frame cage support and legs every 4 feet to protect against cage sag and trough

wear and Galv-A-Weld (welded black then galvanized) cage construction for long, trouble-free life... a choice of feeding systems to help you take control of feed costs: Meal Master Feedkar (traveling feed hopper), M.T. (rotating Flex Auger), and NEW Ultraflex (80 ft. per minute circulating Flex Auger).

And, with Chore-Time feeding systems you can take full advantage of the new production-boosting, feed-saving MEAL-TIME® feeding method developed by Chore-Time. Our feeding systems are designed to minimize waste and provide each bird with fresh, Un-Picked-Over feed.
