Hydraulic tip storage

A new device which protects hydraulic tips from dirt and moisture when farm implements are not in use is announced by Snap-tite Ouick Disconnect Division. Union City. PA. Known as Stor-Tip, the patented tip-holder drastically reduces hydraulic tip replacement and hydraulic repairs caused by contamination. Stor-Tips mount easily to the implement frame rail by a U bolt, and can be stack mounted for multiple hydraulic lines. Stor-Tips are available in molded plastic with field replaceable rubber cartridges and high quality molded rubber. Each Stor-Tip measures 3-1/4 inches long by 4 inches wide by 2 inches high and accepts two hydraulic tips. For further information write for bulletin ST-64, Snap-tite, Inc., Quick Disconnect Division, Union City, PA 16438...or call 814-438-3821.

White Oak names Lloyd director of dairy feeds

Oak Mills is offering improved service to its Cumberland Valley dairy customers through the appointment of a Director of Dairy Sales and Nutrition for the Cumberland Valley.

Newville resident Donald E. Lloyd has been named by White Oak owners John and Mark Wagner to head up this expansion of services. Lloyd, who grew up on a dairy farm, has spent the last eight years selling feeds and service in the area. He joined the White Oak team because of "product, price and low overhead.

"Everybody has a ton of feed to sell and every ton has a pricethere has got to be something else, like service," explains Lloyd. His first move in his new position was to institute a weekly route for a portable mill to service the customers he has come to know.

Sold on the advantages computerization can give to a dairyman, he maintains a file on every customer which considers he concludes.

ELIZABETHTOWN - White the equipment, the state of the herd and the unique needs of each. He then provides individualized follow-up. Noting that, "I treat each farm individually because no two are exactly alike," the new White Oak man insists that service is what dairy farmers need.

> A 1964 graduate of Big Spring High School, Newville, Lloyd has received training at the Delaware Valley College of Science and Agriculture, Doylestown and Messiah College, Grantham. He served ten years with the Mennonite Central Committee. His assignments included working as a food canner, welder and disease research volunteer as well as spending three years in Zaire.

> **Currently servicing Cumberland** and Franklin Counties from his home, he can be reached at 717 776-5730 or through the mill toll-free at 800 468-5524.

> "I emphasize field coordinating of the dairyman's needs to give them the opportunity to prosper,"

New antibiotic available

to swine producers

LINCOLN, Nebr. - A new oral, water-soluble antibiotic for control of intestinal E. coli (coli-bacillosis) and other bacterial infections of swine has been introduced by Nordan Laboratories. Trade named 'Apralan,' the product is available as a powder for administration in drinking water to weanling pigs. Apralan contains apramycin sulfate, which has activity against many types of bacteria. Apramycin is particularly effective against E. coli.

Apralan proved highly effective in university studies involving 360 pigs in herds with E. coli scours problems. Apralan-treated pigs had an average weight advantage of more than 3 lbs. at the end of 7 days. Even though medication was discontinued after 7 days. Apralantreated pigs weighed 4.9 lbs. more than untreated pigs at 21 days. Treated pigs also had a higher gain-to-feed ration than controls. For each pound of feed, treated pigs gained .78 lbs. while untreated pigs gained only .48 lbs.

Apralan has a high degree of safety. Studies showed that multiple doses administered for extended periods had no adverse effects in pigs or pregnant sows.

Apralan is now available from veterinarians.

Pennfield promotes four

LANCASTER - Ernest O. Horn, Jr., President of Pennfield Corporation has announced the promotion of four employees.

Promoted to Vice President and General Manager of the Feed Operations Division is E.O. 'Mike" Horn, III. Horn has been the Corporate Fleet Manager for the past three years. Prior to that time he held various management positions with the company in the production and delivery operations. He is a resident of

Kenneth T. Greenwood, 2616 Spring Valley Road, has been named Director of Milling Operations. Prior to this appointment, he had served as Manager of Feed Production since joining the company in 1979. Greenwood earned his B.S. in Agricultural Engineering from North Carolina State University.

Replacing Greenwood as Manager, Feed Production, is Donald E. Horn, Jr., 351 Bluebell Drive, Mountville. Since graduating from Delaware Valley College, he has served in feed production supervisory positions, the most recent being Manager of the company's Rohrerstown Mill.

Randall J. Adams, 723 N. Lime Street, has been appointed Manager, Transportation. Adams has been with Pennfield in a management training capacity since receiving his B.S. degree from Millersville University.

E.O. "Mike" Horn III

Farm Credit sponsors five at National 4-H Conference

YORK - The Pennsylvania Farm Credit Service sponsored five Pennsylvania 4-H'ers and one 4-H volunteer leader selected to attend National 4-H Conference last April.

From the opening night inspiration service on the steps of the Capitol building to the closing assembly the following week, leaders and 4-H members had many memorable experiences to take home.

participants sponsored were Debbie Fagley, Montgomery County; Jamie Simcox, Clinton County; Chris Shive, York County; Missi Mallino, Indiana County; and Titina Ott, Westmoreland County. Lois Pifer was the 4-H leader who attended along with Carol Schurman, 4-H agent from Indiana County who acted as chaperone for the group. This year's delegation received partial support from the nine Pennsylvania Farm Credit Services. Pennsylvania Farm Credit Service has sponsored the Pennsylvania the past three years.

The two-fold purpose of this conference is to involve youth, volunteers, and staff in national program development and ways to develop a stonger public image of 4-H. The former objective is met through the appointment of participants to one of fourteen consulting groups. These groups meet at length during the conference to discuss the assigned topics and make recommendations in a final report to the staff of USDA. These recommendations, where feasible, are then incorporated into future 4-H programming.

The second purpose is accomplished through an expanded and strengthened 4-H Ambassador. program which provides training for one member from each state who will be available for 4-H form and competed against over 70

Returning from a recent trip to National 4--H Conference in Washington, D.C., Pennsylvania's Outstanding 4-Hers make their report to a representative of their sponsor, Pennsylvania Farm Credit Service. Pictured from left to right are Debbie Fagley and Jamie Simcox, 4-Hers, Bobby R. Jones. Chairman of the Farm Credit Service Pennsylvania Marketing Committee; Carol Schurman, 4-H Agent; Lois Pifer, 4-H volunteer leader; and Chris Shive. 4-Her.

promotion and public relations efforts throughout the country. This year's Pennsylvania ambassador was Titina Ott and one of Tina's first assignments was to speak at the reception at the White House for President Reagan and members of his staff.

The 4-H'ers are selected from the Outstanding 4-Her and Personal Development nomination form through the National Awards program. Each delegate filled out a Pennsylvania Award Report 4-H'ers from across the state to receive this honor. A selection process for volunteers of county and regional nomination with final selection by the State 4-H Program Development Committee makes up the final number of this delegation.

Participants represented fortyeight states, Puerto Rico, the Virgin Islands, and all Canadian provinces. National 4-H Conference is a peak experience, capping a successful 4-H career for these delegates.
