FICKES SILO CO. PRESENTS The NEW Silo-Matic 9200 UNLOADER

NO BLOWER

LOW HORSEPOWER

NO COLLECTOR RING

HIGH DISCHARGE

NO DOOR CHANGING

The main gathering auger is heavy duty 16" diameter, with 5/16" flighting mounted on a 4" tube. The auger has adjustable front and rear 14 gau. galvanized shields,

for maximum capacity. The auger is powered by a 60 lb. gearbox which brings forage to the center for the delivery chain.

To deliver the high volume of forage from the sweep auger to the inside chute, a heavy duty hook chain with hardened cutters is used to convey the forage. The stainless steel top shield is easily removed to adjust the chain if needed. The plate and V pipe keep the delivery chain positioned over the inside chute in the forage.
