Around here most top hybrids have one thing in common.

They're all from Pioneer.

When most seed salesmen stop by to talk, they usually spend their time talking about that one "hot" number they have to sell.

But your Pioneer sales representative is a little different. He has a whole line up of top performing hybrids. So, when he comes by, he doesn't talk just one hybrid. He talks HYBRIDS. He talks corn.

3744

Performance wise, **3744** is tough to beat. Besides outyielding the competition by a wide margin over the last three years, **3744** usually dries down faster. It has excellent root and stalk strength, resists Northern, Southern and Carbonum Leaf Blights, and does well under higher populations and higher management or irrigation.

3352

This newcomer has already proven itself as the yield leader for its maturity. Over the last three years in this area, **3352** holds a significant yield advantage against competitive hybrids. Now, that kind of performance speaks for itself. But besides yields, **3352** has very good emergence and early vigor along with excellent staygreen and leaf disease resistance against Northern and Southern Leaf Blights, Eyespot and Gray Leafspot. This hybrid is going to surprise a lot of folks.

3378

A leading hybrid with the ability to deliver big, hefty yields in poor growing seasons as well as good growing seasons. **3378** owes much of this success to its hearty agronomic traits like outstanding plant health, superb standability, fast emergence, strong drouth tolerance and ears that "flex" to accommodate growing conditions. With so much going for it, it's not hard to see why **3378** is a lot of growers' favorite corn. Plant some and you'll be convinced too.
