

You Won't Find A Better No-Till Drill Than GREAT PLAINS

THE NO-TILL HITCH THAT WORKS

Call Us For A Demonstration

Great Plains Solid Stand® drills have the planting accuracy drilled soybeans need; (1) Depth-Gauging Press Wheels keep the opener from penetrating too deep; planting depth can be quickly changed with exclusive dial-a-depth adjustment system. (2) Double Down-Pressure Springs hold opener firmly in the soil — preventing the bouncing action which leaves seed scattered on top of the ground.

(3) Special Seed Chute places seed in the very bottom of the v-slot, rather than allowing slot to partially close prior to seed release.

Here's why:

A unique pivot between the coulter unit and the drill allows each disk opener to track exactly in the slot cut by the coulter in front — even while the unit is rounding a curve.

Excellent penetration is also achieved, thanks to a heavy-duty framework, calcium-fillable transport tires, and a special weight transfer design which applies some of the weight of the drill itself to the coulters. Should additional weight be needed, specially designed weight brackets are available which accept most tractor suitcase-style weights. In all, up to 400 lbs. of weight per coulter is possible — ensuring penetration even in the toughest ground.

Finally, all Combination Drill Hitches feature a quick hitch for attaching easily to 3-point drills. So you have the flexibility to no-till some acreage, then switch back to a conventional seeding method as conditions vary.
