John Deere presents five easy-starting cures for the snow blower blues

Has it happened to you before? On a cold, dark morning, you wake up to six inches of new snow and the snow blower won't start. The snow blower blues strike again.

Now there's a cure for the snow blower blues. From John Deere snow throwers and snow blowers with specially winterized engines and optional electric-start kits designed to start easily, dependably on the coldest, snowiest mornings.

For regions that receive light to moderate snowfall, choose the Model 322 John Deere snow thrower. The 322 has a primer and a choke. This system provides quick cold-weather starts.

For heavier snow conditions, choose one of our rugged two-stage snow blowers. The new 522 blows out a 22-inch swath. The 524 has a 24-inch cut.

Get a cure for the snow blower blues today. See your John Deere dealer and check out a new snow blower or thrower.
