Bright New Stars Debut January 23rd

NEW FOR '86

Now there's an all-purpose tractor with the power and size of the classic 4020... the 95-hp 3150

Some 21 years since its introduction, the classic John Deere 4020 still maintains its lofty position as the best all-purpose, under 100-hp tractor to ever turn a furrow.

But farming today may require even more. More fuel efficiency, more lugging power and state-of-the-art operator comfort. With these demands in mind, John Deere introduces the new all-purpose 3150 Tractor with Caster/Action™ MFWD.

The new 3150 and 4020 are the same horsepower and have almost the same dimensions. But a 6-cylinder, 359-cubic-inch, naturally aspirated engine allows the 3150 to produce 95* PTO hp from less fuel. In fact, factory tests indicate the 3150 Tractor is about 5 percent more fuel efficient than the 4020.

And while the 3150 develops the same horsepower as the 4020, it actually has more torque reserve than the classic. It's better able to handle varying loads in the field and forms a perfect team with the 16-speed TSS (top-shaft-synchronized) Hi-Lo transmission.

TSS has twice as many speeds as the 4020 and hydraulic Hi-Lo lets you better utilize them. The Hi-Lo gives you a no-clutch, power shift on-the-go under load within each gear. And synchronized shifting allows you to shift on the go with light or medium loads.

The 4020 was nimble in the field, but didn't come with front-wheel drive as standard equipment. The new 3150 features Caster/Action MFWD for terrific traction. And even with MFWD the 3150 has the agility to "turn on a dime." Like its predecessor, the 3150 is the right size to swing in and out of tight places. And it does! The main reason it's such a good handling tractor is the patented pivot-axis of Caster/Action.

The steering knuckle is tilted to the rear for an exclusive 12-degree caster angle. This lets the top part of the inside wheel lean away from the tractor during a turn while the lower part angles under the frame. There's more wheel clearance so you can turn tighter — almost as tight as a 4020.

* Horsepower measured at the PTO at 2,400 rpm in factory test

**10% DISCOUNT FOR CASH
ON ALL JOHN DEERE PARTS
DURING FARMING FRONTIERS!**

CAPS OF ALL COLORS ARE WELCOME AT OUR JOHN DEERE '86 FARMING FRONTIERS

No matter what color your cap or machinery... you're invited to our John Deere Farming Frontiers Program. Not only will we show you what's new in machinery from John Deere for '86 and present educational farm topics, we will offer some food and express our dealership's willingness to serve you. John Deere Farming Frontiers is unlike any other event; come and let us show you why!

**LEADERSHIP
YOU CAN COUNT ON**

Thurs., Jan. 23 10 AM & 7 PM
