# PROTEK™

The new technology in protein efficiency.

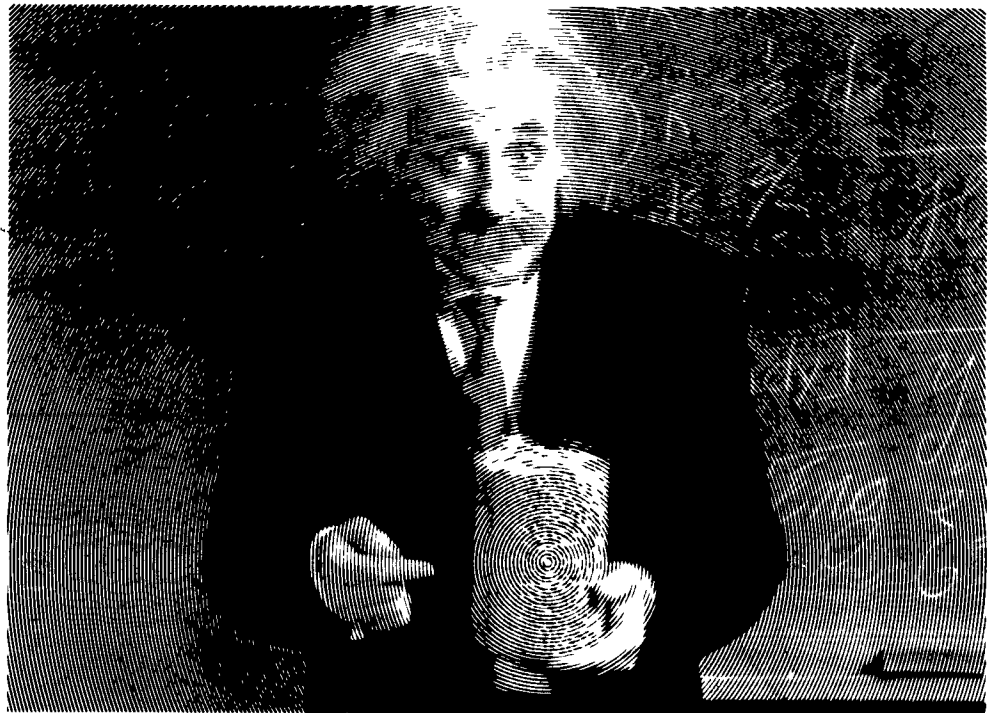

PAT PENDING

**“I’d call this a major scientific discovery for dairy feeding.”**

When you can reduce protein in the milking ration by 15 to 20 percent while maintaining milk production, that’s efficiency! And that’s exactly what new ProTek™ feeding is all about.

This new technology of protein treatment can greatly improve protein utilization by dairy cows. And do it consistently. That’s because ProTek is a unique new process rather than just another reformulation of protein sources. It’s an exclusive process developed by Central Soya Research. Patent is pending.
