A Model To Fit Every Engine!

Free engine intake air power drives the unique Enginaire Precleaner. The angled louvered plates (1) direct the intake air flow to turn the stainless steel rotor (2) which is mounted on dual oversized heavy-duty bearings (3) up to 5000 RPM. This causes centrifugal force and intake compression around the inside perimeter of the highly polished aluminum hood (4) to expel heavier air contaminants out through the discharge port (5). Clean dry air is drawn into the plenum chamber (6) and then into the engine (7).

Keeps Snow Out Of Air Cleaner!
